

D E S C R I P T I O NPRODUCT COVERED:

UPS Power Distribution Units for use only with MATRIX Series UPS Equipment, Models MKA100-MKA199, followed by suffix numbers and letters.

GENERAL:

The products covered by this Report are intended to provide a means for distributing the power output from this manufacturer's Listed MATRIX 3000 and 5000 Series uninterruptible power supplies. Each power distribution unit is provided with a power supply cord, consisting of a length of flexible cord terminating in an attachment plug. Power distribution is accomplished by various combinations of receptacles and output overcurrent protectors.

ELECTRICAL RATINGS:

<u>Max Input, 50/60 Hz</u>		<u>Max Output, 50/60 Hz</u>	
<u>V</u>	<u>A</u>	<u>V</u>	<u>A</u>
120/240	24	120/240	24
208	24	208	24

Note: Input/output ratings are determined by the input attachment plug configuration.

MODEL DIFFERENCES:

Suffix numbers and/or letters indicate the number, configuration and/or rating(s) of output receptacles and/or overcurrent protectors, as indicated below:

- a. Suffix letter B - indicates the provision of output overcurrent protection (Breaker).
- b. Suffix number, when used in conjunction with brackets [] - indicates a multiplier.
