

Product End-of-Life Instructions

Product Range: Exiway-Easyled

Marketing Model/Name: EXIWAY-EASYLED IP42 L170 1NCT ref.OVA38355

Covered range: OVA38350, OVA38351, OVA38352, OVA38355

Purpose:

The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Note :

This product family is in the scope of EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

Size in mm:

H x L x D in mm: 116x292x37

Weight without battery: 406g

Weight with battery: 495g

Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy :
Reuse → Depollution → Dismantling → Shredding.

The components of the products that are recommended to be depolluted (according to the WEEE 2002/96/EC list) or that are recommended to be reused or dismantled so as to improve the material recovery or that lead to some hazard are listed, identified and located hereunder.

The diagram illustrates the recommended end-of-life treatment steps for a device. It shows three views of the device's plastic housing and its internal components. Red arrows point from labels to the specific parts:

- 3: Plastic part (1/3)**: Points to the top cover of the device.
- 2: Battery**: Points to the battery pack inside the device.
- 1: Printed circuit board**: Points to the main board inside the device.
- 3: Plastic part (2/3)**: Points to the bottom cover of the device.
- 3: Plastic part (3/3)**: Points to the internal plastic frame of the device.

Number on drawing	Components	Weight	Comment
Components listed for depollution			
1	Printed circuit board	73g	1 part
2	Battery	89g	1 part
Components listed for dismantling operation which improves the recycling performance			
3	Plastic parts	331g	3 parts
