

I-Line[®] OEM Panelboard Interiors

Flexible for Small and Large Applications

Class 2120

Retain for future use.

Designed for Immediate Use in Most Applications

I-Line[®] panelboard interiors from Schneider Electric are designed for immediate use in a multitude of original equipment manufacturers' (OEMs') applications. They are versatile, time-proven panels—built with traditional Schneider Electric quality. I-Line OEM panels are great for the small panel builder or the large equipment manufacturer.

Application Information

Table 1: Application Information

Service	600 Vac Maximum, 250 Vdc Maximum
Mains	1200 A Maximum—Main Lugs
	1200 A Maximum—Main Circuit Breaker
Branches	Molded Case Circuit Breakers
	BD, BG, BJ, BK, HD, HJ, HL, HR, QB, QD, QG, QJ, JD, JG, JJ, JL, JR, LA, LD, LG, LJ, LL, LR, MG, MJ, PG, PJ, PK, PL, RG, RJ, RK, RL
	15–100 A; 1-pole 15–1200 A; 2- and 3-pole
Terminals	Underwriters Laboratories [®] (UL [®]) Listed for the type of wire specified
Federal Specifications	W-P-115b Type 1, Class 1
	W-C 375B (Circuit Breakers)
NEMA Standards	NEMA PB-1
UL Standards¹	UL 67 Panelboards
	UL Component Recognized
	UL Listed Short-Circuit Current Rating (SCCR) (Integrated Equipment Rating)
	UL 489 Circuit Breakers

¹ I-Line OEM interiors are labeled cURus and I-Line chassis interiors are labeled cULus.

Features and Benefits

I-Line Bus Stack

The I-Line panelboard gets its name from its unique single vertical main bus stack. Plated bus bars are supported continuously by molded polyester glass insulators. A large base insulator of the same material aligns with and supports branch breakers. The bus bar stack is held together securely between continuous steel channels with steel bolts jacketed in high dielectric strength, impact-resistant polycarbonate. The mounting design allows simple circuit breaker installation.

Circuit Breakers

All I-Line circuit breakers have integral connectors with absolutely no hardware to assemble. The connection, or plug-on jaws are of a “blow-on” design and permanently fastened to the line end of the circuit breaker. So, they grip the bus bar more firmly during fault conditions.

Choose from a variety of circuit breakers:

Table 2: Circuit Breakers

Circuit Breaker Type	Description
Micrologic™ Trip	The PowerPact circuit breakers with Micrologic Trip have microprocessor-controlled adjustments for long-time, short-time and instantaneous trip, and optional ground-fault tripping protection.
Thermal-Magnetic	Standard trip breakers come in frame sizes from 100–1200 A. All I-Line circuit breakers have “user-friendly” information written clearly on the front.

Panelboard Interiors

I-Line OEM panelboard interiors are designed to meet the specific needs of OEM customers by truly allowing the freedom of “custom-designing” a panel to suit a specific application. They are the simplest to mount, with pre-tapped mounting holes for channel or pan mounting.

I-Line OEM panels are interiors only. They do not come with boxes, deadfronts, or covers. They are single or double sided, and come as main lug, main circuit breaker or universal bus structures.

Choose from the following types of panelboard interiors:

Table 3: I-Line Interior Types

Panelboard Interior Type	Bus Ratings/Circuit Breakers
HRA	Bus rating of 1000 A and 1200 A at 600 Vac accommodates up to 1200 A trip circuit breakers at 600 Vac
HCJ	Bus rating of 400 A to 800 A main lugs or main breaker at 600 Vac accommodates up to 250 A J-frame feeders
HCP	Bus rating of 400 A to 1200 A main lugs and 400 A to 800 A main breaker at 600 Vac accommodates up to 800 A P-frame feeder
HCPSU	Bus rating of 800 A universal bus at 600 Vac accommodates up to 800 A P-frame circuit breaker
HCRU	Bus rating of 1200 A universal bus at 600 Vac accommodates up to 1200 A R-frame circuit breaker
HFA	Bus rating of 400 A at 600 Vac accommodates up to 150 A trip circuit breakers, or up to 225 A circuit breakers at 240 Vac
HKA	Bus rating of 400 A accommodates up to 250 A trip circuit breakers at 600 Vac
HLA	Bus rating of 400 A accommodates up to 400 A trip circuit breakers at 600 Vac
HMA	Bus ratings of 600, 800, and 1000 A accommodate up to 800 A trip circuit breakers at 600 Vac
