

The Wiser™ home management system is a comprehensive demand-management solution for utilities and homeowners. This easy-to-use, integrated system allows homeowners to reduce energy use during peak periods and helps electricity providers improve grid efficiency and network reliability.

Wiser empowers homeowners to improve energy use and efficiency through intuitive demand response, energy monitoring, and automation. The system sheds load, manages load increases, reduces grid uncertainty, and increases homeowner convenience and satisfaction without an expensive infrastructure upgrade.

Wiser energy information and energy management products offer an intuitive plug-and-play, demand response management solution for utilities and their homeowner customers. The wireless system components built with ZigBee® Smart Energy technology make Wiser an easy, user-friendly, complete home energy management solution. New energy technologies can also be managed when Wiser is integrated with the smart grid, such as: enabled electric vehicle (EV) charging stations and solar power inverters.

Wiser supports

demand response, time-of-day pricing, and critical-peak pricing — controlling home HVAC to conserve energy.

Make the most of your energySM

The Wiser home

Mobile App and Web Portal

Activate your system at www.wiserenergy.com to see and control your energy use anytime, anywhere.

Coordinator

Upload information from Wiser equipment to the cloud for easy access from the mobile app and Web Portal.

Smart Thermostats

Make automatic temperature adjustments according to your lifestyle.

Smart Plug

Conveniently automate and control lamps, electronics, and small appliances.

Load Control

Monitor, control, and schedule large loads such as HVAC, pool pumps, or electric hot water heaters.

Panel Meter

Monitor whole home energy use and relay data to your personal Web Portal and mobile app.

EV Charger and Solar Power Inverter

Easily integrate and manage EV chargers and solar products.

In Home Display

See your energy use, and remotely program and control your thermostats, lights, and electronics or appliances.

Security

Upgrade your system to monitor and control your security systems and locks.
