1.0 Executive Summary

This document is an internal document created to explain the purpose of the StruxureWare™ for Data Centers ETL Integration service.

The ETL Integration service is a custom service that will have an individual Statement of Work (SOW) for each opportunity. Data will be collected to determine integration points, and to understand the customer expectation for ETL integration on the Schneider Electric ETL Initial Data Collection Form. The outcome of this document will be a quotation identifying which data will be transferred between systems and how it will be displayed. The effort required to perform all the integrations is proportional to the amount of systems, the amount of sources/entities (data coming from different sources with different attributes) and the amount of data/information to exchange (Power, voltage, pressure, etc).

2.0 Features & Benefits

Features	Benefits
Oracle placeholder	Allows for the custom integration of third party systems

3.0 Details of Service

There are no specific activities associated with this item. The related service activities are stated in respective individual Statement of Work.

4.0 Assumptions

The service assumes and individual SOW

5.0 Deliverables

The deliverables associated with this service are outlined in the respective SOW.

6.0 Exclusions

There are no exclusions associated with the service.

7.0 Scope of Responsibility

There is no Scope of Responsibility associated with the service.

8.0 Project Work Details

There are no Project Work Details associated with this service.

9.0 Pricing

The StruxureWare Data Center ETL Integration (WNSWETL) is a stand- alone customizable service that will be priced based on the complexity of the integration.
