

Product End-of-Life Instructions

MiCOM P40 - 40TE Cases

Product overview

Product Range: MiCOM P40

Marketing Model/Name: All MiCOM P40 w. 40TE cases

Size: H x W x D in mm = **180 x 210 x 260**

Weight in kg ≈ 7.5

Purpose

The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy :

Reuse → Separation for special treatment → Other dismantling → Shredding

 **DANGER**

HAZARD OF ELECTRIC SHOCK, ELECTRIC ARC OR BURNS

- Before performing any intervention:
 - Turn off all power supplying the protection relay and the equipment in which it is installed before working on it.
 - Always use a properly rated voltage sensing device to confirm that power is off.
 - Replace all devices, doors, and covers before turning on power to this equipment.
 - Apply appropriate personal protective equipment and follow safe electrical work practices. See local regulation.

Failure to follow these instructions will result in death or serious injury

The components of the products that optimize the recycling performances are listed, identified and located below.

Recommendation	Number on drawing	Components	Weight (g)	Comment
Special treatment	1	PCBAs, incl capacitors & LCD screen	≈1300	Weight and number of boards is indicative & depending on the chosen hardware options
Other dismantling	-	Rest of relay	≈5700	

EoLI in compliance with Schneider Electric TT03 v5 procedure
