

# Product Environmental Profile

## TeSys GV3ME80 motor circuit breaker

## General information

### Representative product

TeSys GV3ME80 motor circuit breaker - GV3ME80

### Description of the product

The main purpose of the TeSys GV3ME80 motor circuit breaker is to protect three-phase motors and cables against short-circuits and overloads.

### Functional unit

Protect during 20 years the installation against overloads and short-circuits in circuit with assigned voltage up to 690V AC and rated current 80A. This protection is ensured in accordance with the following parameters:

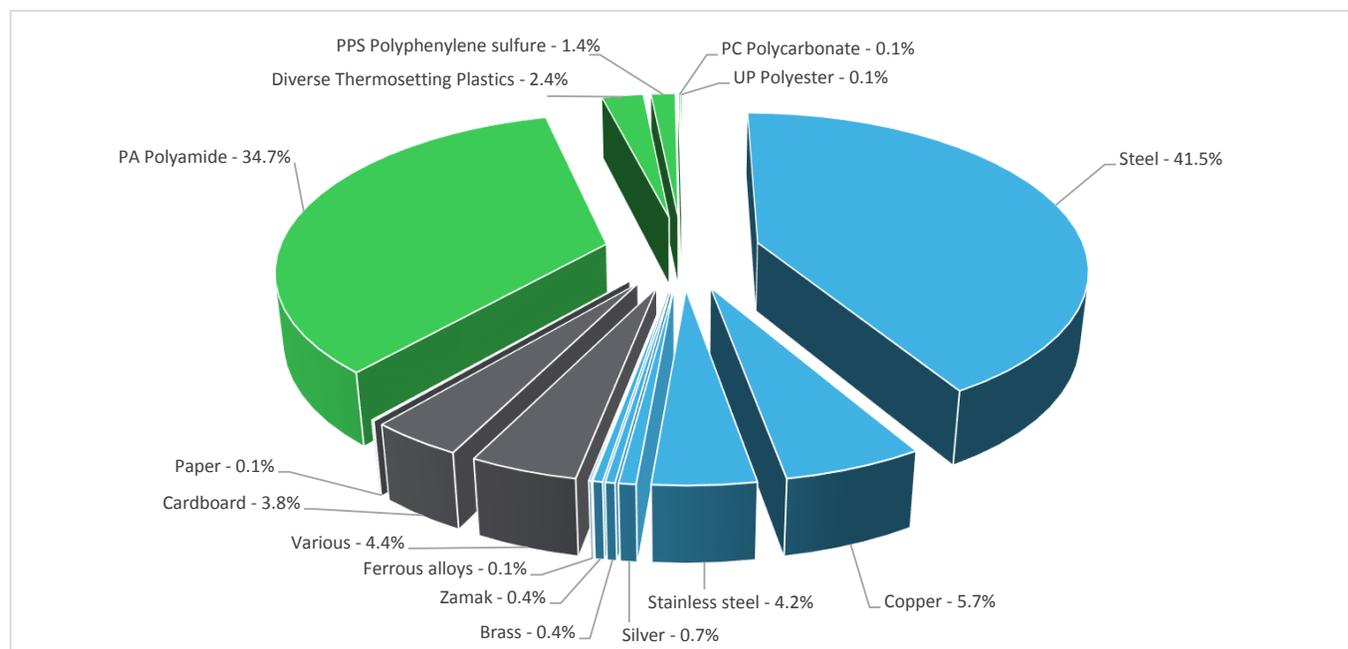

- Number of poles 3
- Rated breaking capacity Ics at 415VAC = 15kA (according to IEC 947-2)

## Constituent materials

### Reference product mass

745.6 g including the product, its packaging and additional elements and accessories

Plastics	38.7%
Metals	53.0%
Others	8.3%

## Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

## Additional environmental information

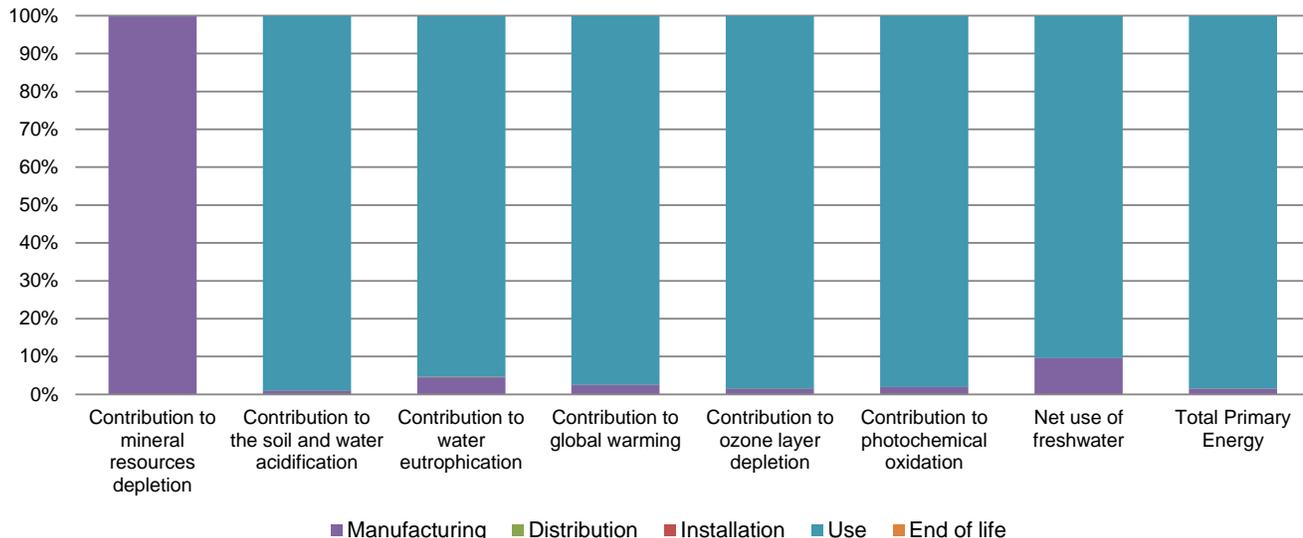

The TeSys GV3ME80 motor circuit breaker presents the following relevant environmental aspects

<b>Manufacturing</b>	Manufactured at a Schneider Electric production site ISO14001 certified		
<b>Distribution</b>	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 29.4 g, consisting of cardboard(98.6%), Paper(1.4%)		
<b>Installation</b>	Ref GV3ME80 does not require any installation operations.		
<b>Use</b>	The product does not require special maintenance operations.		
<b>End of life</b>	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials  No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process.  Recyclability potential: <b>51%</b> Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).		

## Environmental impacts

<b>Reference life time</b>	20 years		
<b>Product category</b>	Circuit-breakers		
<b>Installation elements</b>	No special components needed		
<b>Use scenario</b>	Load rate: 50% of In Use time rate: 30% of RLT		
<b>Geographical representativeness</b>	Europe		
<b>Technological representativeness</b>	The main purpose of the TeSys GV3ME80 motor circuit breaker is to protect three-phase motors and cables against short-circuits and overloads.		
<b>Energy model used</b>	<b>Manufacturing</b>	<b>Installation</b>	<b>Use</b>
	Energy model used: France	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27
			<b>End of life</b>
			Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27

Compulsory indicators		TeSys GV3ME80 motor circuit breaker - GV3ME80

\* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.6.0.1, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
