Product Environmental Profile

QOvs MCB

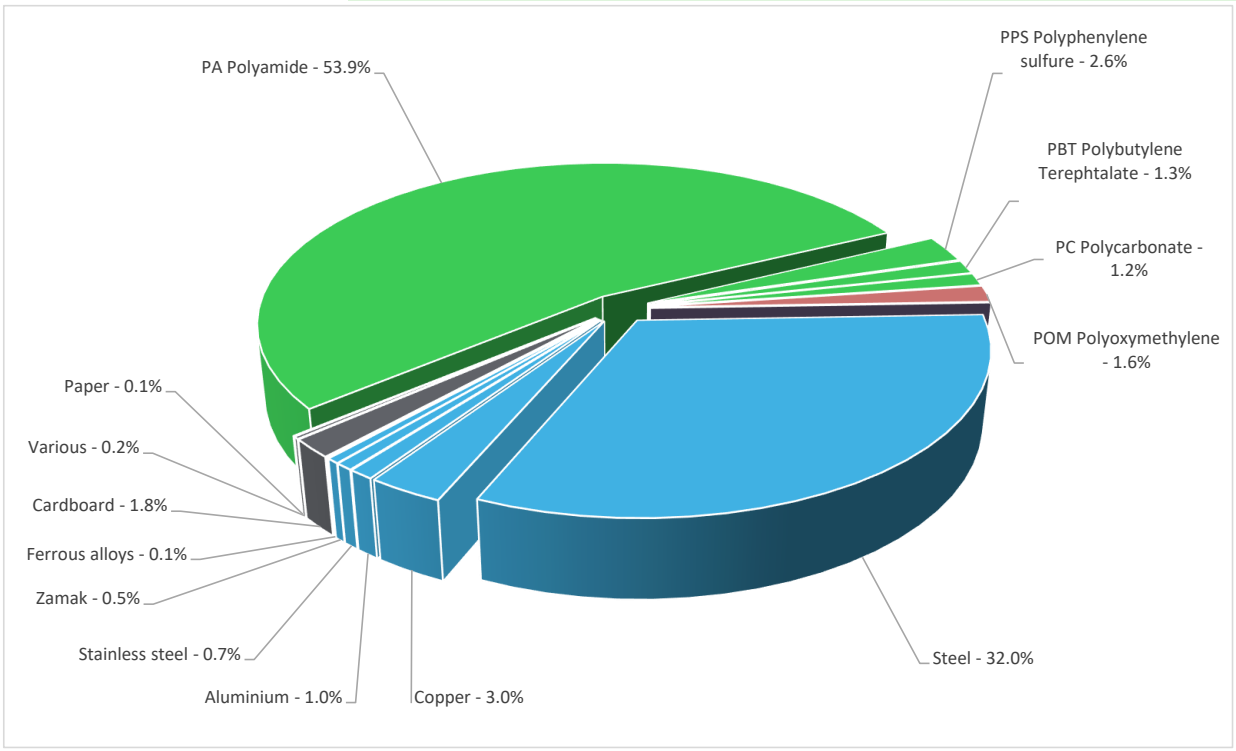
QO MCB Series

General information

Reference product	QOvs MCB - QO132VSC6
Description of the product	Provide overload protection and short circuit protection in low voltage power system
Description of the range	This range consists of QOvs MCB of 6A to 32A, 1P to 3P, C curve. The representative product used for the analysis is QOvs MCB 1P 32A C type (commercial reference: QO132VSC6). The mass of the product range is from 104g and 312g including packaging. The environmental impacts of this reference product are representative of the impacts of the other products of the range which are developed with a similar technology.
Functional unit	Protect during 20 years the installation against overloads and short-circuits in circuit with assigned voltage 240V and rated current 32A. This protection is ensured in accordance with following standard: IEC/EN 60898-1, and the following parameters: - Number of poles: 1 P - Rated breaking capacity: 6000 A - Tripping curve: C

Constituent materials

Reference product mass	106 g	including the product, its packaging and additional elements and accessories



Plastics	60.60%	
Metals	37.30%	
Others	2.10%	

Substance assessment

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website
https://www.se.com/ww/en/work/support/green-premium/

Additional environmental information

End Of Life	Recyclability potential:	**37%**	Recyclability rate has been calculated based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the "ECO'DEEE recyclability and recoverability calculation method" was taken. If no data was found a conservative assumption was used (0% recyclability).

Environmental impacts

Reference service life time	20 years			
Product category	Circuit-breakers			
Installation elements	The product does not require special installation procedure and requires little to no energy to install. The disposal of the packaging materials are accounted for during the installation phase (including transport to disposal).			
Use scenario	Load rate: 50% of In Use time rate: 30% of RLT			
Technological representativeness	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production			
Geographical representativeness	UK			
Energy model used	**[A1 - A3]**	**[A5]**	**[B6]**	**[C1 - C4]**
	Electricity Mix; Production mix; Low voltage; TH	Electricity Mix; Production mix; Low voltage; UK	Electricity Mix; Production mix; Low voltage; UK	Electricity Mix; Production mix; Low voltage; UK

Detailed results, including all the optional indicators mentioned in PCRed4, and the split of the Use Phase (B1 to B7), are available in the LCA report and on demand in a digital format - Country Customer Care Center - http://www.schneider-electric.com/contact

** represents less than 0.01% of the total life cycle of the reference flow*

Life cycle assessment performed with EIME version v5.9.4, database version 2022-01 in compliance with ISO14044.

Detailed results, including all the optional indicators mentioned in PCRed4, and the split of the Use Phase (B1 to B7), are available in the LCA report and on demand in a digital format - Country Customer Care Center - http://www.schneider-electric.com/contact

According to this environmental analysis, proportionality rules may be used to evaluate the impacts of other products of this range, ratios to apply can be provided upon request

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number :	ENVPEP2104004_V1	*Drafting rules*	PEP-PCR-ed4-2021 09 06
Verifier accreditation N°		*Supplemented by*	PSR-0005-ed2-2016 03 29
Date of issue	2023/08/17	*Information and reference documents*	www.pep-ecopassport.org
		Validity period	5 years

Independent verification of the declaration and data, in compliance with ISO 14021 : 2016

Internal X External

The PCR review was conducted by a panel of experts chaired by Julie ORGELET (Ddemain)

PEP are compliant with XP C08-100-1 :2016 or EN 50693:2019

The elements of the present PEP cannot be compared with elements from another program.

Document in compliance with ISO 14021 : 2016 « Environmental labels and declarations. Type II environmental declarations »
