Product Environmental Profile

Vivace HOTEL KEY CARD

Vivace

General information						
Reference product	Vivace HOTEL KEY CARD - KB31EKT_WE					
Description of the product	The product is used for the energy saving purpose of hotel rooms, the main use is to plug the card to take electricity.					
	This range includes other color key cards.					
Description of the range	The environmental impacts of this reference product are representative of the impacts of the other products of the range which are developed with a similar technology.					
Functional unit	The main function of the product is to solve the empty room state and cut off the power supply of the room. The function unit is accordance with the following technical data: -Rated Voltage: 250V ~ -Rated Current: 16A -Installation center distance: 60.3mm -Standard security: IEC 60669-2-1					

Constituent materials

Substance assessment

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website https://www.se.com/ww/en/work/support/green-premium/

(1) Additional environmental information

```
End Of Life
```

7%

Recyclability potential:

Recyclability rate has been calculated based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the "ECO'DEEE recyclability and recoverability calculation method" was taken. If no data was found a conservative assumption was used (0% recyclability).

O Environmental impacts

Reference service life time	10 years					
Product category	Other equipments - Active product					
Installation elements	The disposal of the packaging materials is accounted for during the installation phase (including transport to disposal).					
Use scenario	The product is in active mode 50% of the time with a power use of 4W and in stand-by mode 50% of the time with a power use of 0.5W, for 10 years.					
Technological representativeness	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA- EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production.					
Geographical representativeness	Malaysia					
	[A1 - A3]	[A5]	[B6]	[C1 - C4]		
Energy model used	Electricity Mix; Production mix; Low voltage; VN	Electricity Mix; Production mix; Low voltage; MY	Electricity Mix; Production mix; Low voltage; MY	Electricity Mix; Production mix; Low voltage; MY		

Detailed results, including all the optional indicators mentioned in PCRed4, and the split of the Use Phase (B1 to B7), are available in the LCA report and on demand in a digital format - Country Customer Care Center - http://www.schneider-electric.com/contact
