1 Products affected

Commercial reference	Product	FW version
LSS100100	Wiser for KNX	2.4.0
LSS100200	spaceLYnk	2.4.0

2 U.Motion Compatibility

If the Wisier for KNX or spaceLYnk Controller is used together with a U.Motion Touch Panel in the installation, please check the compatibility table below **before** proceeding with the FW upgrade in the controllers. The new FW 2.5.0 in Wisier for KNX and spaceLYnk includes the new Touch 3.0 visualization with several new features. This new visualization has minimum browser requirements and **it's not fully supported by all U.Motion client Touch Panels.**

Please check the Commercial Reference, Serial Number and OS System in your device and compare it with the following table:

Touch Panel Client	Commercial References	OS Version	Selling Date		Serial Number		Touch 3.0 Compatibility	Observation
			Start	End	Start	End		
U. Motion 7" V2/V3	MEG6260-0307 MTN6260-0307	Android 6	Oct-18	ongoing	S3002702	ongoing	Supported	Please update the Touch Panel with the latest FW "Android 6.0 v2" available in the U.Motion Software & Firmware download section in se.com and merten.de
U. Motion 7" V2		Android 4.2	May-2016	Sep-2018	S3000605	S3002701	Not supported	The browser in the Touch Panels doesn't meet the minimum requirements to fully support the new Touch 3.0 visualization. Schneider Electric recommends using instead the Touch 2.0 visualization available in FW <2.4.0 together with these Touch Panels.
U. Motion 7" V1		Android 2.3	May-2014	Feb-2016	S3000001	S3000602		
Touch Panel Client	Commercial References	OS Version	Selling Date		Serial Number		Touch 3.0 Compatibility	Observation
			Start	End	Start	End		
U. Motion 10" & 15" v2	MEG6260-0310 MTN6260-0310 MEG6260-0315 MTN6260-031	Linux	Jun-2017	ongoing	S2001482	ongoing	Will be supported (with some considerations)	To support the new Touch 3.0 visualization, the browser and the FW in the Touch Panels must be updated.
U. Motion 10" & 15" v1		Linux	May-2014	June 2017	S2000001	S2001481		The new FW 1.4.4 (including the new browser) together with a step by step update guide will be available before the end of July 2020 in the U.Motion Software & Firmware download section in se.com and merten.de

3 Changes

3.1 Added

- KNX project (*.knxproj) import
- Snap to grid option for visualization editor
- Fast Modbus mapping
- 28 new Modbus profiles
- New KNX DPTs
 - » 12.600 RGBW color
 - » 20 1 byte enumeration
 - » 20.004 priority
 - » 20.007 alarm class
 - » 20.102 HVAC mode
 - » 20.110 heater mode
 - » 20.111 fan mode
 - » 20.112 master/slave mode
 - » 27.001 4byte combined on/off
 - » 238.600 1 byte DALI diagnostics
 - » 250.600 3 byte DALI brightness and color temperature control
 - » 251.600 6byte DALI RGBW
- Size of control elements in Visualization
- Folders in Schedulers & Trends
- Improved Trend exports (datepicker)
- EnOcean push buttons dimming/blind control
- CPU overload warning
- Scene delays (sequencer)
- Touch 3
- Improved FBEditor
- Show plan/widget ID in edit form view
- Add object update time reference to localbus and pass object as a second parameter to object events
- Additional classes for popover control elements
- Add widget-show/widget-hide events to visualization

3.2 Changed

- Minimum icon size in PC/Tablet visualization 5px

3.3 Security

- Visualization / Plan PIN brute force protection

4 Upgrade procedure

1. **Click Configurator** -> **System** -> **System** -> **Upgrade firmware**
2. **Find** firmware for your product
3. **Click OK**

Note: It is highly recommended to create backup of your actual project before upgrade!

Note: We recommend to use always the latest firmware because of optimization of writing data to microSD cards, running services, cyber security etc.

Note: Check HW version of your logic controller. There are available HW 1.xx, HW 2.xx and HW 3.xx in parallel on the market. HW version is located in the side label of the controller.
