

## EGX100 Firmware

Click the Files tab to access the latest EGX100 firmware.

### EGX100 Version 3.000 Firmware

This firmware version provides improved validation of the IP Address, and the IP Address / Subnet Mask combination.

To properly update the EGX100:

1. Transfer the version 3.000 firmware file (eg03000.bin) to your computer.
2. Via FTP, copy the *eg03000.bin* file from your computer to the root directory of the EGX100.  
**Do not remove power until programming is complete.** Once the file transfer is complete, the EGX100 will automatically reboot. Refer to the EGX100 user's guide if you need more information
3. Verify that the download was a success by browsing the Firmware Version in the 'Gateway Information' section of the Diagnostics page.

**Note:** During firmware updates, communication to serial devices through the EGX100 is not available.
