

Need a quick, economical, energy efficiency renovation?

You're one, easy panelboard retrofit away from saving 30% on energy costs.

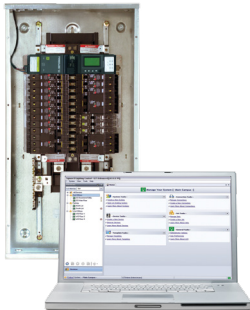

Powerlink™ Lighting Control solutions include overcurrent protection and automated lighting controls in one standard panelboard.

Schneider
Electric™

Improve energy efficiency with one compact solution.

Fully assembled and tested, Powerlink lighting panels are easy to install or retrofit and provide a fast ROI. Increase your energy savings month-over-month and year-over-year with one single, compact solution.

Powerlink Lighting Controls

- > Enjoy automated and schedule-based lighting control for efficiency and cost reduction.
- > Control and monitor panels from remote locations.
- > Reduce energy use by up to 30%* with automated shutoff of lights during unoccupied periods.
- > Receive instant alerts with remote email alarming.
- > Obtain reliable overcurrent protection for continuous power.
- > Gain important energy use insights with integral metering provided by MPV.

**Performance reflects actual customer experience, your results may vary depending on your environment.*
