

Gaming Solutions Guide

The Gamer's solution guide for unexpected power outages.

Take a moment to envision your gaming space. Sitting in the comfort of your home, filled with excitement because you finally slayed the dragon and collecting the exotic loot you always wanted or you're in an intense ranked match, about to win and this will be the match that promotes you to platinum rank! Then all of a sudden. . . your power goes out.

All your time, loot, platinum rank and bragging rights are gone. Anxiously waiting in the dark, you are hoping your loot saved or you didn't get banned. Power finally comes back on and you scramble to turn on your console or PC. Then your worst fears are realized while pressing the power button. It won't not turn on.

APC™ by Schneider Electric offers SurgeArrest™ for protection against damaging power surges and Back-UPS™ Pro, which are uninterruptible power supplies (UPS) that provide both surge protection and instant battery backup power for your gaming equipment, so when your powers goes out, you **Game On**.

UPS Benefits for Gamers

- **Protect Gaming Equipment**
 - Protect your expensive gaming equipment from destructive power surges caused by utility power failure and lightning storms
- **Maintain Network Connection**
 - Even after safely shutting down your gaming setup, a UPS will continue to power your router and/or modem enabling you stay online to play mobile games or stream movies
- **Save Your Games**
 - A UPS provides backup power to your gaming setup to complete your boss battle or quest and safely save your game to avoid any story progression loss or worse; corrupted saved game files
- **Avoid De-ranking**
 - Unexpected power outages will cause you to disconnect from a competitive game resulting in a temporary ban and loss of rank points
- **Preserve Your Reputation**
 - For your team, there is no difference between “Quitting Early” or losing power. Players will report you for abandoning/quitting early, affecting your competitive stats and your reputation
- **Don't Lose Microtransaction**
 - Power outages can be painful, especially during an in-game transaction. This could cause you to lose your in-game purchases and your money

Popular Competitive Games' Penalty for Disconnecting

Overwatch®

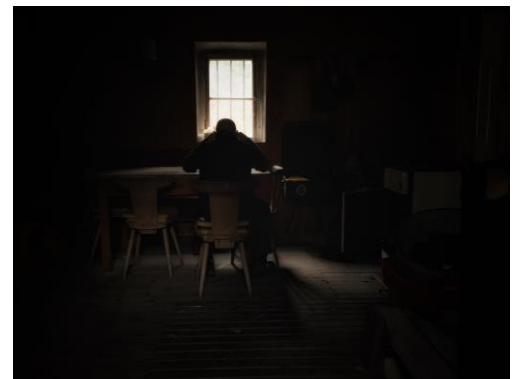

- 50 SR points loss
- 10 minutes to season ban

League of Legends®

- 3 -10 league points loss
- 10 - 20 minutes ban

Counter Strike: Global Offensive®

- Increase in Offensive Level
- 30 minutes – 7 days ban

APC UPSs provide gaming setup protection and battery backup power to ensure you stay online and avoid game saving data corruption from unexpected power outages.
