

NetShelter SX with Shock Packaging Certified to Ship with Cisco® UCS installed!

“Rack and stack” made Easy for Equipment Integrators and Converged and Hyperconverged and now certified with Cisco for UCS deployments.

GLOBALY AVAILABLE CABINET PLATFORM

> Available globally all with shock packaging

ROBUST EQUIPMENT FASTENING SYSTEM

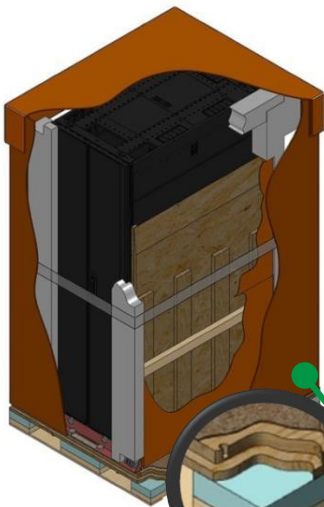

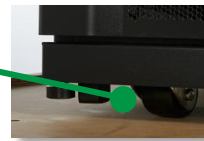

- > 24 additional fasteners beyond the standard equipment rail fastening
- > Supports load even under high vibration
- > Holds rail position securely during transport

HEAVY DUTY, EASY MANEUVER CASTORS

> Offer more durability, higher load ratings, and smoother rolling profile to ensure proper performance at the delivery site, fixed for easy guiding & steering

CABINET ELEVATION / PALLET BRACKETS

> Secures rack to pallet and removes weight load from the castors during shipment protecting castors

EASY TO USE RAMP

- > Built in rails guide cabinet safely to floor
- > Stores within pallet footprint and easily attaches to pallet

COMPLETE OUTER WRAP & PROTECTIVE FRONT/REAR SIDE INSERTS

- > Easy reusable plastic locking clips
- > Convenient place for integrator logos
- > Conceals cabinet contents
- > Shields equipment from dust and debris

MULTI-LAYER PALLET

- > Absorbs impact and vibration during transit
- > Distributes cabinet load evenly across pallet
- > Supports weight of cabinet & equipment installed during integration / travel time

Cabinets designed to safely load, transport, unload and deploy a cabinet with up to 2000lb (900kg) of IT equipment installed.
