

INTEGRATED EQUIPMENT SOLUTIONS

Protect your revenue stream with integrated solutions to keep your equipment and store running 24/7.

SQUARE D[™]
by Schneider Electric

WHY USE INTEGRATED EQUIPMENT?

Minimize space requirements

Electrical panels and controls are stacked in a modular lineup, which saves valuable floor and wall space, leaving more room for products.

Lower installation costs

Contractor labor risks are minimized since panels, fueling, and lighting controls are factory-assembled and prewired.

Reduce material handling

Fewer items to receive and inventory on-site since components are factory-installed and prewired into the integrated equipment.

Save design time

Customer-specific designs can be standardized for multiple locations.

Shorten cycle times

Preassembled construction means less time required on-site to install. Reduction in overall construction cycle.
