

InfraStruXure[™] Cooling Distribution Unit (CDU)

Guide for Receiving, Unpacking, and Moving

Note

Save these instructions. This guide contains important information for receiving, unpacking, and moving the CDU to its final location.

Safety Information

Do not attempt to move the CDU without assistance. The recommended equipment to move the CDU while still on its shipping pallet includes the following:

Pallet
jack

Forklift

The unit has a high center-of-gravity. Use extreme caution when unpacking or tipping the unit to move it to its final location.

Inspect the Shipment

Before unpacking the shipment, verify that the labeled boxes match the bill of lading. To ensure that the CDU has arrived in perfect condition, carefully inspect the exterior and interior of the shipment immediately upon receipt.

Inspect the CDU

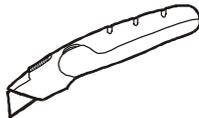

Once you have unpacked the unit, carefully inspect the enclosure.

Note

In case of shipping damage, such as scratches or dents, contact the APC Technical Services department at (888) 695-6500.

Tools Required

Utility knife

13mm wrench

How to Unpack the CDU

The shipping materials are recyclable. Save them for later use, or dispose of them appropriately.

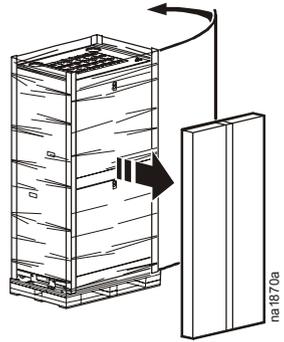

Note

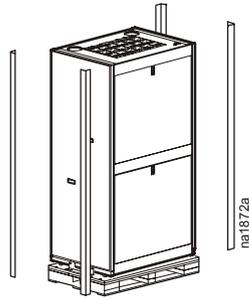

Use caution when using an utility knife to cut the plastic wrap. Make cuts to the plastic wrap only where the plastic wrap is in direct contact with the cardboard packaging.

1. Remove the plastic wrap securing the ramps to the unit, and set the ramps aside. Continue removing the plastic wrap from the unit.

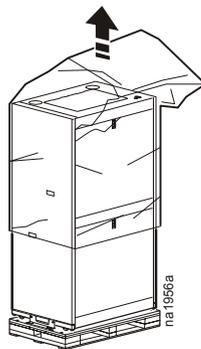

Note: Ramps are in a cardboard box wrapped to the unit.

2. Remove cardboard packaging.

3. Remove the plastic bag from the unit.

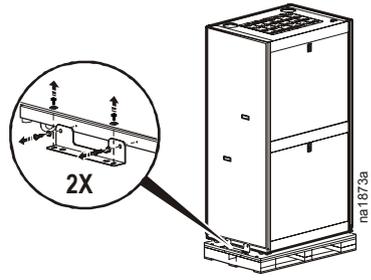

Note

When possible, leave the CDU on the pallet until you are ready to place it in its final location.

- Using a 13-mm wrench, remove the eight bolts, eight washers, and two brackets holding the CDU to the pallet.

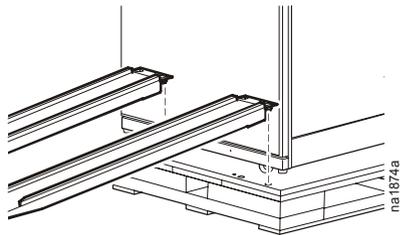

NOTE: If the unit is to be secured to the floor, save the bolts, washers, and brackets.

- Remove ramps from cardboard packaging.

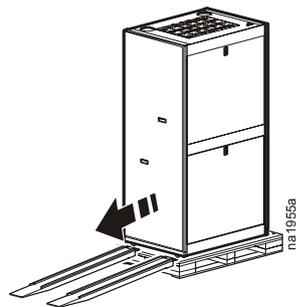

- Attach each ramp to the pallet by placing the attachment tabs on the ramps into the tab holes on the pallet.

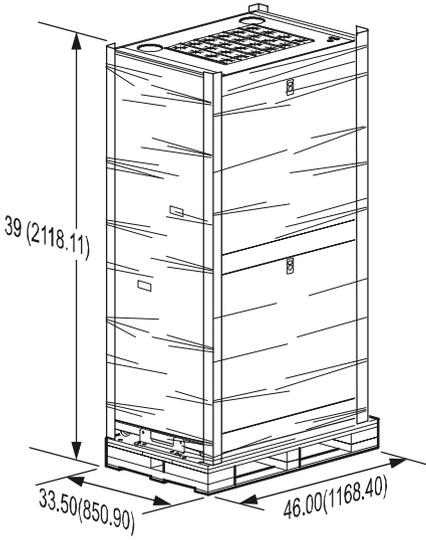

Moving the unit requires two people. Always move the unit from the front.

- Roll the unit off the pallet using two people.

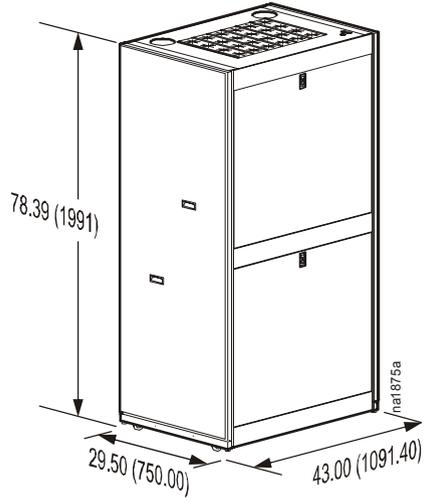

Leaving the CDU uncovered and exposed to the elements will damage the Unit and void the factory warranty.

Dimensions and Weights

Packed: 622 lbs (282.13 KG)

Unpacked: 550 lbs (249.47 kg)

* Dimensions are shown in inches, with millimeters in parentheses.
