Concerning the use of Harmony HMISTU and HMISCU terminals for applications in potentially explosive atmospheres (Zones 2/22)

Schneider Electric
8ème rue, ZI Carros
06516 Carros cedex – France

Type examination certificate: INERIS 13ATEX3013X
IECEX Certificate of Conformity: IECEx INE16.0016X
Type examination certificate: CML 21UKEX4778X

SAFETY INSTRUCTIONS

Read these instructions carefully, and look at the equipment to become familiar with the device before trying to install, operate, or maintain it. The following special messages may appear throughout this documentation or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of this symbol to a “Danger” or “Warning” safety label indicates that an electrical hazard exists, which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

DANGER indicates a hazardous situation which, if not avoided, will result in death or serious injury.

The information in this document is subject to change without notice.

**PLEASE NOTE**

Electrical equipment should be installed, operated, serviced, and maintained only by qualified personnel. No responsibility is assumed by Schneider Electric for any consequences arising out of the use of this material. A qualified person is one who has skills and knowledge related to the construction and operation of electrical equipment and its installation, and has received safety training to recognize and avoid the hazards involved.

**SCOPE**

This present document applies when the Harmony HMISTU and HMISCU terminal bears marking and provides important information when used in hazardous areas. This documentation has to be kept and always refer to those instructions for installation, operation, maintenance or evolution of your system.

You can download this instruction guide at www.se.com.
If any translation is needed, you can contact your local Schneider support or sales center.

Harmony HMISTU and HMISCU terminals are only supplied with 24 Vdc.
Relevant Standards

These device have been manufactured in accordance with:

DANGER

POTENTIAL FOR EXPLOSION

Install, use, and maintain these modules in accordance with:

- Standard IEC 60079-14: Explosive atmospheres - Part 14: Electrical installations design, selection and erection.
- Standard EN 60079-17: Inspection and maintenance of electrical installations in hazardous areas.
- Edicts, by-laws, laws, directives, circulars, standards, regulations and any other document relating to where the apparatus is installed.

Failure to follow these instructions will result in death or serious injury.

Permitted zones of application

Refer to the section "Markings" to get information about the permitted zones of protection and the types of protection.

- Harmony HMISTU and HMISCU terminals installed in zones 2/22 hazardous areas must be certified and bear $\text{Ex}$ marking
- Ensure with the marking that the terminals are compatible with the conditions permitted for the hazardous area at the site where it is being used.
Installation, Operation and Maintenance

Make sure you follow all the recommendations in the Harmony HMISTU and HMISCU user manual, and additionally those listed below.

⚠️ DANGER

POTENTIAL FOR EXPLOSION

- Confirm that the location is free from explosively hazardous gases or dust before connecting or disconnecting equipment, replacing or wiring modules.
- The service temperature in the suitable enclosure must not exceed 50°C (122 °F).
- Confirm each interface (COM, Ethernet, USB, power line, …) has been securely locked.
- Confirm that any USB cable has been attached with its appropriate clamp.
- Install the certified equipment in a protective enclosure providing at least IP54 protection when applied in zone 2 environments and IP6x when applied in zone 22 environments. This protective enclosure must be certified for hazardous areas zone 2 or 22.
- Do not open the protective enclosure while the system is powered up.
- Confirm that the power supply has been turned OFF before disconnecting, replacing or wiring modules.
- Ensure that ground at power supply is properly connected.
- Do not use equipment that has been damaged.
- Use Touch Pen XBTZGPEN to all terminals at using zone 2 and zone 22 areas to avoid the risk of electrostatic discharges.
- Do not expose the terminal to direct sunlight.
- The terminal must be protected against accidental shocks.
- Do not allow layers of dust to form on terminals: it should be cleaned regularly.

Failure to follow these instructions will result in death or serious injury.
**Markings**

ATEX and IECEx markings, applied to the Harmony HMISTU and HMISCU terminals, are as follows:
