Harmony GTO ATEX/IECEEx Instruction Guide

Concerning the use of Harmony GTO graphic terminals for applications in potentially explosive atmospheres (Zones 2/22)

Schneider Electric
8ème rue, ZI Carros 06516 Carros cedex – France

Type examination certificate: INERIS 12ATEX3007X
IECEEx Certificate of Conformity: IECEEx INE16.0057X
Type examination certificate : CML 21UKEX4748X

SAFETY INSTRUCTIONS

Read these instructions carefully, and look at the equipment to become familiar with the device before trying to install, operate, or maintain it. The following special messages may appear throughout this documentation or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of this symbol to a “Danger” or “Warning” safety label indicates that an electrical hazard exists, which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

DANGER indicates a hazardous situation which, if not avoided, will result in death or serious injury.

The information in this document is subject to change without notice.

**Please Note**

Electrical equipment should be installed, operated, serviced, and maintained only by qualified personnel. No responsibility is assumed by Schneider Electric for any consequences arising out of the use of this material. A qualified person is one who has skills and knowledge related to the construction and operation of electrical equipment and its installation, and has received safety training to recognize and avoid the hazards involved.

**Scope**

This present document applies when the Harmony GTO terminal bears marking. They are supplied only with 24 Vdc. This documentation has to be kept and always refer to those instructions for installation, operation, maintenance or evolution of your system.

You can download this instruction guide at www.se.com.

If any translation is needed, you can contact your local Schneider support or sales center.
Relevant Standards

The product have been manufactured in accordance with:

DANGER

POTENTIAL FOR EXPLOSION

Install, use, and maintain the product in accordance with:

- Standard IEC 60079-14: Explosive atmospheres - Part 14: Electrical installations design, selection and erection.
- Standard EN 60079-17: Inspection and maintenance of electrical installations in hazardous areas.
- Edicts, by-laws, laws, directives, circulars, standards, regulations and any other document relating to where the apparatus is installed.

Failure to follow these instructions will result in death or serious injury.

Permitted zones of application

Refer to the section "Markings" to get information about the permitted zones of protection and the types of protection.

- Harmony GTO terminals installed in zones 2/22 hazardous areas must be certified and bear the \( \text{Ex} \) marking
- Ensure with the marking that the terminals are compatible with the conditions permitted for the hazardous area at the site where it is being used.
Installation, Operation and Maintenance

Make sure you follow all the recommendations in the Harmony GTO Quick Reference Guide and additionally those listed below.

⚠️ DANGER

POTENTIAL FOR EXPLOSION

- Confirm that the location is free from explosively hazardous gases or dust before connecting or disconnecting equipment, replacing or wiring modules.
- The service temperature in the suitable enclosure must not exceed 50°C or 55°C (refer to marking).
- Confirm each interface (COM1, COM2, LAN), field wiring terminal blocks and the SD Card / Battery Cover have been securely locked.
- Confirm USB cables are attached with its appropriate clamp.
- Install the product in an enclosure EPL Gc insuring a minimal ingress protection IP54 for use in zone 2 and in an enclosure EPL Dc insuring a minimal ingress protection IP6x for use in zone 22.
- Make sure the purging test inside the product is performed and validated in accordance with IEC 60079-2 when installed in an IP4X pressurized enclosure.
- Do not install the product in the environment more than pollution degree 2 as defined in IEC 60664-1.
- Do not open the enclosure while the system is powered up.
- Confirm that the power supply has been turned OFF before disconnecting, replacing or wiring modules.
- Ensure that the FG (Functional Ground) on the power supply is properly connected to ground.
- Ensure the Stainless Bezel Part (for HMIGTOxx15) is properly connected to ground.
- Use only screw fasteners suitable for installations in explosive atmospheres.
- Do not use damaged equipment.
- Use Touch Pen XBTZGPEN on all Harmony GTO used in zone 2 and zone 22 areas to avoid the risk of electrostatic discharges.
- Protect the terminal against accidental shocks.
- Use only the identical replacement battery (HMIZGBAT) for the product equipped with replaceable battery.

Failure to follow these instructions will result in death or serious injury.
**CAUTION**

ENVIRONMENTAL HAZARDS TO THE EQUIPMENT

- Do not allow layers of dust to form on Harmony GTO terminals. Clean the terminal regularly.
- Ensure that Harmony GTO terminals are installed according to its manufacturer’s specifications.

**Failure to follow this instruction can result in injury or equipment damage.**

---

**Ground Connection**

Metal part for HMIGTO6315, HMIGTO5315, HMIGTO2315 should be connected to ground.

When installed in a metal cabinet or enclosure, the contact point shall be paint free and metal cabinet or enclosure should be grounded.

1. Gasket (Non-metal)
2. Panel (Metal)
3. Brackets (Metal)
4. M4 Hex nuts (Metal)
**Markings**

ATEX and IECEx markings, applied to the Harmony GTO terminals are as follows:

<table>
<thead>
<tr>
<th>Models:</th>
<th>Models:</th>
</tr>
</thead>
<tbody>
<tr>
<td>HMIGTO6315, HMIGTO6310, HMIGTO5315, HMIGTO5310, HMIGTO4310, HMIGTO2315, HMIGTO2310</td>
<td>HMIGTO2300, HMIGTO1310, HMIGTO1300, HMIGTO3510</td>
</tr>
</tbody>
</table>
