By next year, all digitally transformed organizations will generate at least 45% of their revenue from ‘future of commerce’ business models (IDC).
A changing mindset: solving problems instead of making technology

**Legacy**
- Siloed and asynchronous
- Centralized
- Fragmented value chain
- Company-centric product development
- Single-sided market

**Digital**
- Dynamic and real-time
- Distributed
- Global, extended value chain
- Community-centric problem solving
- Multi-sided market
The present is digital

- Internet of Things
- Artificial Intelligence
- Machine Learning
- Augmented Reality
Triggerring rapid evolutions of ecosystems
A view of the building ecosystem
How can we leverage the value of this data to make it meaningful for you?

90% of data generated from connected things was created over JUST the last 2 years!
Panel Discussion
Schneider Electric Exchange
Open sharing-economy ecosystem for IoT energy management and automation solutions

Create
We are committed to developing integrated efficiency solutions across all domains in energy management and automation on an open ecosystem

Collaborate
We celebrate diversity of communities, co-creating solutions to serve the full life cycle

Scale
We effectively and efficiently scale exponential growth opportunities for all communities
