Schneider Electric Announces North America Software User Group Forums for Second Half of 2016

Four user groups are planned for Schneider Electric Software customers to gain insights into industry best practices, meet with peers and learn about new product announcements

LAKE FOREST, Calif. – August 16, 2016 – Schneider Electric, the global specialist in energy management and automation, today announced four North America User Group events will be hosted by their industrial software, manufacturing and process automation division. These events will be focused on helping customers to solve industry challenges and leverage the IIoT and new user consumption models (Cloud, Mobility) to enable business transformation. The forums will be held September through December 2016. Current and prospective customers, partners and solution providers are invited to attend.

Reflecting a continued focus on technology leadership and innovation, Schneider Electric Software will host this series of User Group events to offer unparalleled access to the company's executive and product development teams. Attendees will have an opportunity to network with industry peers, learn best-practice techniques, discover new products, see the latest product roadmap and strategically plan investments in solutions for industrial operational excellence.

Four events are planned, as outlined below:

- **Process Industries Business Excellence** in Pasadena, California, on Sept. 13-15 ([event webpage](#))
- **Empowering People to Control Their World Through Connected Technology** in Orlando, Florida, on Oct. 3-6 ([event webpage](#))
- **Maximize Return on Assets** in Chicago on Oct. 17-19 ([event webpage](#))
- **Collaboration of People and Processes** in Houston on Dec. 5-7 ([event webpage](#))

Registration is now open for all events. Learn more by visiting the above event webpage links.

About Schneider Electric

Schneider Electric is the global specialist in energy management and automation. With revenues of ~\$30 billion in FY2015, our 160,000+ employees serve customers in over 100 countries, helping them to manage their energy and process in ways that are safe, reliable, efficient and sustainable. From the simplest of switches to complex operational systems, our technology, software and services improve the way our customers manage and automate their operations. Our connected technologies reshape industries, transform cities and enrich lives. At Schneider Electric, we call this **Life Is On**.
