Product Environmental Profile

Tricon CX Pulse Input External Termination Panel Assembly

General information

Representative product	Tricon CX Pulse Input External Termination Panel Assembly - 9712X-110RF
Description of the product	Pulse Input External Termination Panel assembly is part of Tricon CX which helps in providing the signal connectivity to Pulse Input module to measure 0.5 Hz to 32000 Hz Frequency Input.
Functional unit	Provides an interface to capture and measure input signal transitions of frequencies ranging from 0.5 Hz to 32,000 Hz during 10 years.

Constituent materials

Reference product mass	2612 g	including the product, its packaging and additional elements and accessories

	Plastics	5.9%
	Others	94.2%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate– BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website
http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page

Additional environmental information

The Tricon CX Pulse Input External Termination Panel Assembly presents the following relevent environmental aspects	
Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 300 g, consisting of cardboard (99.9%), paper (0.1%) Product distribution optimised by setting up local distribution centres
Installation	The System and Module installation instructions are given in the Tricon CX Installation Guide, Safety Considerations Guide and Field Terminations Guide as applicable.
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains Electronic board (1057g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: **24%** Based on “ECO’DEEE recyclability and recoverability calculation method” (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	10 years for 100% lifecycle			
Product category	Other equipments - Active product			
Installation elements	Tricon CX IO 8131X expansion chassis along with FET and Modules			
Use scenario	The product is for high availability applications for process safety. The product is in active mode "100% ON" for at 10 years with a power consumption of 7 W.			
Geographical representativeness	USA, Europe			
Technological representativeness	Pulse Input External Termination Panel assembly is part of Tricon CX which helps in providing the signal connectivity to Pulse Input module to measure 0.5 Hz to 32000 Hz Frequency Input.			
Energy model used	**Manufacturing**	**Installation**	**Use**	**End of life**
	Energy model used: Mexico	Electricity mix AC; Europe consistent; consumption mix, at power plant; US	Electricity mix AC; Europe consistent; consumption mix, at power plant; US	Electricity mix AC; Europe consistent; consumption mix, at power plant; US

Compulsory indicators		**Tricon CX Pulse Input External Termination Panel Assembly - 9712X-110RF**					
Impact indicators	**Unit**	Total	Manufacturing	Distribution	Installation	Use	End of Life

** represents less than 0.01% of the total life cycle of the reference flow*

Life cycle assessment performed with EIME version EIME v5.8.1, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

According to this environmental analysis, proportionality rules may be used to evaluate the impacts of other products of this range.

Depending on the impact analysis, the environmental indicators of other products in this family may be proportional extrapolated by mass of the product.

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
