### New Feature

#### HTML5-Based Software

The Schneider UPS Monitoring Software is now available in HTML5. Previous versions were Adobe Flash Player-based, which is no longer supported by Adobe.

## Known Issues

[Top ↑](#)

### Known Issue

The scroll bar does not appear on some dialog popups and screens. Workaround: use the arrow keys (↑, ↓) on your keyboard. **NOTE:** The scroll bar does appear in Google Chrome, but it does not work as expected.

When a self-test is scheduled for all listed UPS devices, the self-test is not performed for all devices despite "Battery self-test is going to start" being logged to the Event Log.

The user interface (UI) is not available in Ukrainian. If Ukrainian is selected from the **Language** tab, the UI will appear in English.

UPS alarms do not work as expected for configured events.
