## General

This product software update introduces a new pumping application library to SoMachine V3.1.

## Compatibility

This update package is compatible with **SoMachine V3.1 (3.1.10.1)** only. It requires the installation of SoMachine V3.1 Software and **SoMachine V3.1 Solution Extension**. Application example projects require **Vijeo Designer 6.1 SP1** to be installed.

## Content of this package

The update package contains the following SoMachine V3.1 Software components

- (1) Pumping library V0.0.1.0
- (2) Three pumping library example projects, which are
  - a. Pumping\_Optimized\_Hardwired\_ATV IMC
  - b. Pumping\_Optimized\_Hardwired\_M218
  - c. Pumping\_Optimized\_Modbus\_M238
- (3) Documentation and Online Help update
- (4) Release notes

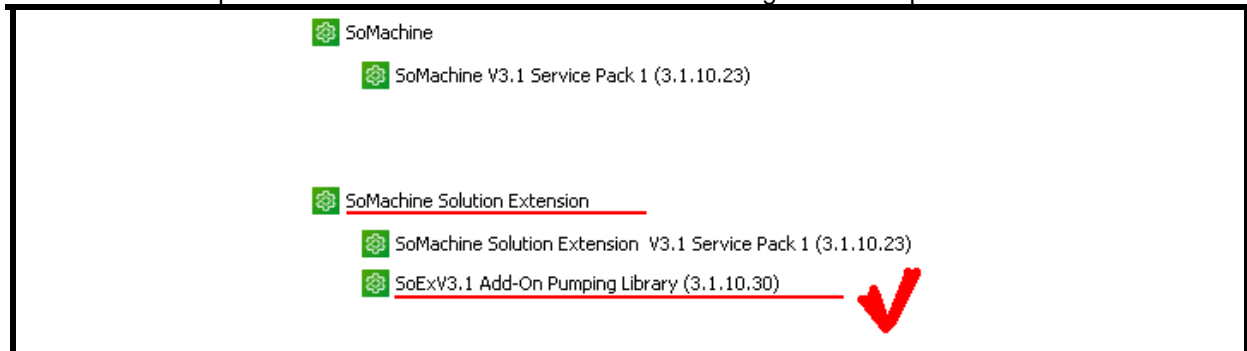

All these components are included in one single installation package called **SoExV3.1 Add-On Pumping Library.exe**.

## Installation

Please note that this add-on requires the existence of the **SoMachine V3.1 Solution Extension!** If this hasn't been installed on your system you have to install it first before you can continue with the installation of this add-on.

To install the software update on your computer, follow the given instructions:

- (1) Close any SoMachine instances running on your PC before you start the update.
- (2) Copy the **SoMaV3.1 Add-On Pumping Library.exe** file to a temporary location on your target system.
- (3) Run the **SoMaV3.1 Add-On Pumping Library.exe** file to start the installation.
- (4) The installation routine does not require any further configuration details. Simply follow the given instructions to install the update.
- (5) A Windows Installer message saying that the program to be upgraded may be missing is an indication that SoMachine V3.1 Solution Extension :
  - is not installed, or
  - current installation of SoMachine is incompatible with this update package.
- (6) After the update has been successfully installed, you will find the update in the "Add or Remove Programs" of the Window's Control Panel. Ensure you have checked the "Show updates" checkbox in the header line of the dialog to see all updates.

Note : this patch cannot individually be removed from SoMachine.
