

Simplify Asset Maintenance and Improve Collaboration

Electrical Asset Lifecycle Management

"I want to improve the lifecycle of my equipment with an effective preventative maintenance program"

Digitalization makes Electrical Asset Lifecycle Management simpler than ever thanks to digital solutions that enable access to up-to-date documentation and proactive maintenance plans.

Moreover, from construction to operation phase, the digital representation of electrical assets provides **convenient reference material at all times, helping everyone to easily collaborate, share and find the information they need.**

Digital Project Collaboration

Project Sharing

-  Clear and consistent project documentation (BIM* ready solution)
-  Convenient digital access to project and asset documentation
-  Collaboration features with professional partners to achieve common goal
-  Key responsibilities identification and contact at different project stages to reduce conflicting or missing information

Digital Logbook

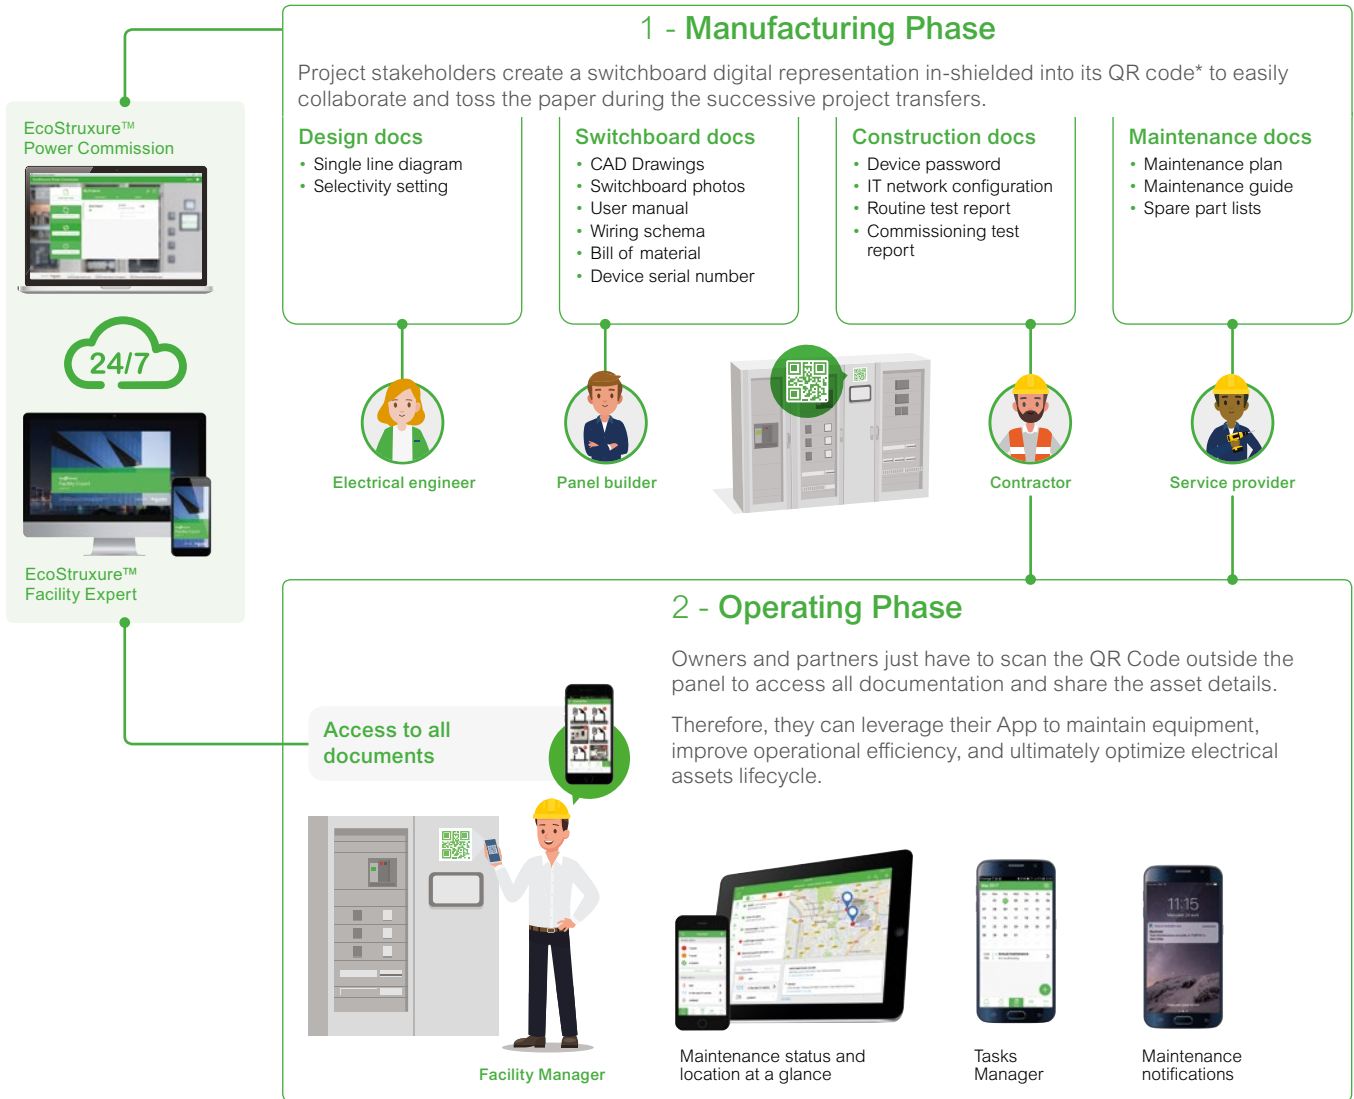

Asset Lifespan Optimization

-  Maintenance status and location at a glance
-  Maintenance plans with auto-generated templates for Schneider Electric assets
-  Actionable task manager:
 - Long term maintenance schedules
 - Reminders
 - Task assignment
-  Asset details and history available from the field
-  Edition and automatic storage of intervention reports
-  Enhanced features available through subscription to optimize equipment lifespan: status, smart alerts, and data trends for connected assets

According to IEEE 0493 standard, "equipment lasts longer and performs better when covered under an effective preventative maintenance program" and NFPA 70B indicates that "total cost of ownership minimized when equipment upkeep is done at proper intervals".

How to Initiate and Use the Digital Logbook During the Asset Lifecycle

Software and Apps

Software and Apps		
Commissioning software	Description	Subscription
EcoStruxure™ Power Commission	Intuitive software to commission and manage electrical equipment	Free
Cloud-based software	Description	Subscription
EcoStruxure™ Facility Expert	Collaborative tool (web portal and app) to ensure preventative maintenance and improve team collaboration	Free
EcoStruxure™ Facility Expert-Operations	Enhanced monitoring features to optimize operational efficiency and business continuity of your electrical installation	Annual subscription

EcoStruxure™ Facility Expert

Android

iOS
