

Main

The timer sends time and date to the bus and can be operated with or without a DCF77 antenna.

Complementary

- Automatic changeover between summer and winter time (can be switched off)
- Own adjustable changeover rule
- The data can be sent periodically or on request
- Lithium cell: time stays the same in the event of loss of bus power

Accuracy: 1 s/day, the application allows additional adjustment

Reserve power: 10 years

Antenna line length: max. 100 m

Type of protection: IP 20

EC directives: Low-voltage guideline 2006/95/EC and EMC directive 2004/108/EC

Device width: 2 modules = approx. 36 mm

Accessories: DCF77 antenna, art. no. MTN668091.

Colour: light grey
