

# Communication Module VCM8000V5045P

## Communication Module for SE8300 Room Controller

Accessory communication module that allows the upgrade of all network-ready SE8000 Series Room Controllers to support networking communication using the ZigBee® Pro wireless protocol.

# VCM8000V5045P Communication Module Features

## AT A GLANCE

### Communication options

- ZigBee Pro extended profile (P)

## Overview

Accessory communication modules allow the upgrade of all network-ready SE8000 Series Room Controllers to support wireless communication.

All current network-ready Schneider Electric™ SE8000 Series Room Controllers are capable of being retrofitted in the field with an accessory communication module. This enables the controllers to be integrated into a ZigBee Pro wireless network.

This approach provides the flexibility to add network communication strategies as budgets allow, or as building management needs change.

## Wireless Option

- Current generation of ZigBee Pro
- Makes SE8000 Series products compatible with SmartStruxure™ Lite solution's StruxureWare™ Building Expert
- Building Expert versions 2.5 and 2.6 offer a fixed Home Automation profile view of the controller and its objects.
- Building Expert 2.7 and subsequent versions offer an extended object profile view of the controller and its objects
- Building Expert 2.7 and subsequent versions can be integrated into SmartStruxure solution and other Schneider Electric building management systems

## Easy Installation

VCM8000V5045P communication modules are easy to install. Network-ready SE8000 Series Room Controllers are specifically designed to enable upgrades to their communication capabilities.

Adding a communication module only takes a few minutes but provides a big advantage to existing installations that require new networking and integration functionality.
