

Conext™ ComBox Android tablet application

New remote monitoring from Schneider Electric™

The Conext ComBox tablet application is the mobile user-interface to the ComBox. Tablet users with the Android operating system can now use the Conext ComBox tablet application to monitor and manage performance of their Solar system “while on the go”.

Available for free download from Google Play, the ComBox Android tablet application allows users to view graphical displays of their solar system harvest, compare energy production, view event logs, upgrade new firmware, and change Conext device settings at any time. Operators of Conext solar systems can now also view system status, and respond to alerts instantly and remotely.

Software

- Minimum Android version 3.0 (Honeycomb)

Hardware

- Minimum screen size (7", 1024 x 600, e.g. Acer Iconia Tab A100, Acer Iconia Tab A500, Google Nexus 7, Asus Transformer TF700T, Samsung Galaxy Tab 2 7.0, Samsung Galaxy Tab 2 10.1)
- Conext ComBox (865-1058)
