

## DL Device Extension: Installation Instructions (SMSDL32U)

Retain for future use.

### INTRODUCTION

Use these installation instructions to increase the number of devices that can communicate with your System Manager DL software. The default is 16 devices; with the upgrade, the software supports 32 devices.

### INSTALLATION INSTRUCTIONS

Follow these steps to install the Device Extension software on an existing System Manager DL computer:

1. Shut down SMS and all Windows programs.
2. Insert the disk named *SMSDL32U* in the System Manager DL computer's CD-ROM drive.

If you have disabled your computer's autorun feature, you will need to launch the installation manually. To do this, click Start > Run, then browse to locate the CD named *16TO32*.

Double-click *setup.exe*. At the run screen, click *OK*.

The *SMSDL Device Upgrade* screen displays:

3. Click Upgrade.
4. When the upgrade is finished, and the *Upgrade Complete* screen displays, click *OK*.
5. Restart the computer to cause the upgrade to take effect.
