New Features in ION Enterprise 6.0 SP1

The new features added to ION Enterprise 6.0 service pack 1 are outlined in the following sections.

New Device Support in ION Enterprise 6.0 SP1

Support for the following devices has been added in ION Enterprise 6.0 service pack 1: EM5600, PM1200 and DM6200.

NOTE

The EM5600 is also sold as the E5600.

To find out if these device are available in your area, please contact your Schneider Electric sales representative.

Supported communications options for these devices are either a direct serial connection or a serial connection through an ethernet gateway communicating via ModbusRTU protocol, using the onboard RS-485 port.

The following table outlines ION Enterprise 6.0 SP1 support for these devices:

Support in ION Enterprise	EM5600	PM1200	DM6200
View real-time data from the device in Vista and WebReach	Yes	Yes	Yes
View historical data from the device in Vista and WebReach	Yes	Yes	No
Use Web Reporter to run reports on historical data	Yes	Yes	No
Make real-time data from the device available to an OPC server through ION Enterprise	Yes	Yes	Yes

Enhanced Report Pack Support

ION Enterprise 6.0 service pack 1 allows custom report packs that use Report Data Extensions to be installed and made available for use in Web Reporter.

For information on custom report packs, contact your Schneider Electric sales representative.

Errata

The following sections outline changes to ION Enterprise documentation since the last release.

Regional Settings Configuration for WebReach and Web Reporter

The instructions for setting regional formatting for WebReach and Web Reporter in the *Language Support in ION Enterprise* technical note have changed. The updated instructions are as follows:

1. Start Management Console and select **Tools > Reporting Configuration Manager**.
2. Select the **Regional Formatting** tab.
3. Select the setting you want to use for dates, times and numbers from the **Regional setting for formatting dates, times and numbers** dropdown list.
4. Select the currency symbol from the **Currency Symbol** dropdown list.
5. Click **OK** to save your changes.

NOTE

For desktop applications, use the Microsoft Regional and Language Options dialog box.

For more information on installing language packs, see the *Language Support in ION Enterprise* technical note.

Using Reporter on Secondary Server or Client

The “Using Reporter on Secondary Server or Client” section of the *ION Enterprise Help* and *ION Enterprise User Guide* is no longer accurate. If you need to use Reporter on a client or secondary server installation, you will need to create the ION_DsnKeys.reg file manually. Contact Technical Support for assistance.
