Uninterruptible Power Supply

3000/5000/6000 VA  200-240 Vac
Tower/Rack-Mount 3U

English
**Introduction**

The APC™ by Schneider Electric Smart-UPS™ RT is a high performance, uninterruptible power supply (UPS) that provides protection for electronic equipment from utility power blackouts, brownouts, sags and surges. The UPS filters small utility line fluctuations and isolates electronic equipment from large disturbances by internally disconnecting from utility line power. The UPS provides continuous power from the internal battery until utility power returns to safe levels or the battery is fully discharged.

**INSTALLATION**

Read the Safety Guide before installing the UPS.

**Unpacking**

Inspect the UPS upon receipt. Notify the carrier and dealer if there is damage.

The packaging is recyclable; save it for reuse or dispose of it properly.

Check the package contents:

- UPS (with battery modules disconnected)
- Front bezel
- Literature kit containing:
  - Product documentation, Safety Guide, and Warranty Information
  - Smart-UPS RT User Manuals CD
- Software CD
- Serial cable
- **3000 VA XLI models**: two output power cords, two input power cords
- **5000/6000 VA XLI models**: four output power cords, Network Management Card documentation

**Specifications**

<table>

| **MAXIMUM**     | 10,000 ft (3,000 m) |
| **ELEVATION**   | 50,000 ft (15,240 m) |
| **OPERATING**   |                    |
| **STORAGE**     |                    |

| **HUMIDITY**    | 0 to 95% relative humidity |

| **WEIGHT**      | 120 lbs (55 kg) |
| **UPS**         | 140 lbs (64 kg) |
| **UPS WITH**    |                |
| **PACKAGING**   |                |

This unit is designed for indoor use only. Select a location sturdy enough to handle the weight. Do not operate the UPS where there is excessive dust or the temperature and humidity are outside the specified limits.

Ensure that the air vents on the front and rear of the UPS are not blocked.
Wiring and Connecting the UPS

5000/6000 VA XLI MODELS ONLY: HARDWIRING INSTRUCTIONS

- Wiring must be performed by a qualified electrician.
- Install a high magnetic 30/32 A utility circuit breaker.
- Adhere to all national and local electrical codes.
- Use #10 AWG gauge (5 mm²) wire.

1. Switch the utility circuit breaker OFF.
2. Remove the input access panel.
3. Remove circular knockout.
4. Run #10 AWG gauge (5 mm²) wire through the access panel, and connect the wires to the terminal block (green: ground, brown: hot, blue: neutral). Use an appropriate strain relief (not included).
5. Switch the utility circuit breaker ON.
6. Check line voltages.
7. Replace the access panel.
CONNECTING THE BATTERY MODULES AND ATTACHING THE FRONT BEZEL

1. Connect the battery modules.
2. Attach the front bezel.
3. Install additional components.
4. Final product view.
**Basic Connectors**

<table>

### 5000/6000 VA XLI Models

- **Output Circuit Breakers**
  - IEC 320-C19 16 A per Receptacle
  - IEC 320-C13 10 A per Receptacle

### 3000/5000/6000 VA XLJ/XLT/XLTW Models

- **Output Circuit Breaker**
  - L6-20 250 V 20 A x 2
  - No Circuit Breaker
  - L6-30 250 V 30 A x 2
CONNECTING EQUIPMENT AND POWER TO THE UPS

1. Connect equipment to the UPS (cables not included for XLJ/XLT/XLTW models).

2. Avoid using extension cords.
   - **3000 VA XLJ/XLT/XLTW/XLI and 5000/6000 VA XLJ/XLT/XLTW models**: Using a power cord, plug the UPS into a two-pole, three-wire, grounded receptacle only.
   - **5000/6000 VA XLJ and 6000 VA XLT models**: To draw full power from the UPS have a qualified electrician cut off the input plug and hardwire the UPS to the appropriate power panel.

3. Turn on all connected equipment. To use the UPS as a master ON/OFF switch, ensure all connected equipment is switched ON. The equipment will not be powered until the UPS is turned on.

4. To power up the UPS press the button on the front panel.
   - The UPS battery charges when it is connected to utility power. The battery charges to 90% capacity during the first three hours of normal operation. Do not expect full battery run capability during this initial charge period.

5. For additional computer system security, install PowerChute Business Edition Smart-UPS monitoring software.

OPTIONS

Refer to the APC by Schneider Electric web site, www.apc.com for available accessories.

</tr>
</tbody>
</table>
**Feature** | **Function**
--- | ---
Cold Start | When there is no utility power and the UPS is off, press and hold the \[\text{Test}\] button to power up the UPS and connected equipment. The UPS will emit two beeps. During the second beep, release the button.

Self-Test | **Automatic:** The UPS performs a self-test automatically when turned on, and every two weeks thereafter (by default). During the self-test, the UPS briefly operates the connected equipment on battery.

**Manual:** Press and hold the \[\text{Test}\] button for a few seconds to initiate the self-test.

| Diagnostic Utility Voltage | The UPS has a diagnostic feature that displays the utility voltage. Plug the UPS into the normal utility power.
|---|---
| 200V 208V | The UPS starts a self-test as part of this procedure. The self-test does not affect the voltage display.
| 0236 0245 | Press and hold the \[\text{Test}\] button to view the utility voltage bar graph display. After a few seconds the five-LED, \(\text{Battery Charge}\) display on the right of the front panel shows the utility input voltage.
| 0217 0226 | Refer to the figure at left for the voltage reading (values are not listed on the UPS).
| 0199 0207 | The display indicates the voltage is between the displayed value on the list and the next higher value.
| 0180 0189 |
| 0161 0170 |

| 220V 230V 240V | 0256 0266 0276 |
| 0238 0248 0258 |
| 0219 0229 0239 |
| 0200 0210 0220 |
| 0181 0192 0202 |

**On Battery Operation**

The UPS switches to battery operation automatically if the utility power fails. While running on battery, an alarm beeps four times every 30 seconds.

Press the \[\text{Test}\] button to silence this alarm. If the utility power does not return, the UPS continues to supply power to the connected equipment until the battery is fully discharged.

When 2 minutes of run time remain the UPS emits a continuous beeping. If PowerChute is not being used, files must be manually saved and the computer must be turned off before the UPS fully discharges the battery.

The UPS battery life differs based on usage and environment. Refer to [www.apc.com](http://www.apc.com), for on battery runtimes.
# USER CONFIGURABLE ITEMS

**CONNECTING THE EPO (EMERGENCY POWER OFF) OPTION**

The output power can be disabled in an emergency by closing a switch connected to the EPO.

*Adhere to National and local electrical codes when wiring the EPO.*

![EPO switch diagram](image)

The EPO switch is internally powered by the UPS for use with non-powered switch circuit breakers. The EPO circuit is considered a Class 2 circuit, (UL, CSA standards) and a SELV circuit (IEC standard).
Both Class 2 and SELV circuits must be isolated from all primary circuitry. Do not connect any circuit to the EPO terminal block unless it can be confirmed that the circuit is Class 2 or SELV.

If circuit standard cannot be confirmed, use a contact closure switch.

Use one of the following cable types to connect the UPS to the EPO switch:

- CL2: Class 2 cable for general use
- CL2P: Plenum cable for use in ducts, plenums, and other spaces used for environmental air.
- CL2R: Riser cable for use in a vertical run in a floor to floor shaft.
- CLEX: Limited use cable for use in dwellings and for use in raceways.
- For installation in Canada: Use only CSA certified, type ELC (extra-low voltage control cable).

**Terminal Mode to Configure UPS Parameters**

3000 VA models:
Terminal Mode is a menu driven interface that enables enhanced configuration of the UPS.

Connect the serial cable to the serial com connector on the back of the UPS.

1. **EXIT** the PowerChute Business Edition using the following steps:
   - From the Desktop, go to Start => Settings => Control Panel => Administrative Tools => Services.
   - Select PCBE Server and PCBE Agent – right click the mouse and select Stop.
2. Open a terminal program. Example: HyperTerminal
   - From the Desktop, go to Start => Programs => Accessories => Communication => HyperTerminal.
3. Double-click on the HyperTerminal icon.
   - Follow the prompts to choose a name and select an icon. Disregard the message, “...must install a modem,” if it is displayed. Click OK.
   - Select the COM port that is connected to your UPS. The port settings are:
     ✓ bits per second - 2400
     ✓ data - bits 8
     ✓ parity - none
     ✓ stop bit - 1
     ✓ flow control - none
   - Press ENTER
4. Example for setting the number of external battery packs (SURT192XLBP):
   Once the blank terminal window is open, follow these steps to enter the number of battery packs:
   - Press ENTER to initiate terminal mode. Follow the prompts:
     • Press 1 to modify UPS Settings. Press e (or E) to modify the number of battery packs. Enter the number of battery packs, including the internal battery pack (Number of packs: 1= internal battery module, 2 = 1 SURT192XLBP, 3 = 2 SURT192XLBP, etc.).
     • Press ENTER.
   - Follow the prompts.
5. Exit the terminal program.
5000/6000 VA models:
Terminal Mode is a menu driven interface that enables enhanced configuration of the UPS.
Connect the serial cable to the serial port on the back of the UPS.

1. Open a terminal program. Example: HyperTerminal
   - From the Desktop, go to **Start => Programs => Accessories => Communication => HyperTerminal.**

2. Double-click on the **HyperTerminal** icon.
   - Follow the prompts to choose a name and select an icon. Disregard the message, “...must install a modem,” if it is displayed. Click OK.
   - Select the **COM** port that is connected to your UPS. The port settings are:
     - bits per second - 2400
     - data - bits 8
     - parity - none
     - stop bit - 1
     - flow control - none
   - Press ENTER

3. Example for setting the number of external battery packs (SURT192XLBP):
   Once the blank terminal window is open, follow these steps to enter the number of battery packs:
   - Press ENTER to initiate terminal mode. Press ENTER multiple times, until the prompt **User Name:** is displayed. Follow the prompts. Type slowly, waiting until each character appears on the screen prior to typing the next character.

Network Management Card defaults:
   - User Name: apc
   - Password: apc
   - Press 1 and ENTER to select Device Manager.
     - Select the model by entering the corresponding number, then press ENTER.
   - Press 3 and ENTER to select Configuration.
   - Press 1 and ENTER to select Battery.
   - Press 2 and ENTER to change the Battery Settings.
     - Type in the number of external battery packs (four battery modules per pack), then press ENTER. (Number of packs: 1 = internal battery module, 2 = 1 SURT192XLBP, 3 = 2 SURT192XLBP, etc.)
   - Press 3 and ENTER to accept the changes.
   - Press ESC multiple times (5) to return to the main menu.
   - Press 4 and ENTER to log out.
MAINTENANCE AND TRANSPORT

Replacing the Battery Module

This UPS has an easy to replace, hot-swappable battery module. Replacement is a safe procedure, isolated from electrical hazards. You may leave the UPS and connected equipment on during the procedure. See your dealer or contact APC by Schneider Electric at the web site, www.apc.com for information on replacement battery modules.

The battery replacement procedure must include replacing all battery modules in the UPS and connected external battery pack(s).

Once the battery(s) are disconnected, the connected equipment is not protected from power outages.
Be careful during battery replacement, the battery modules are heavy.

Be sure to deliver spent batteries to a recycling facility or ship to the manufacturer in the replacement battery packing material.

Removing Battery Modules

1

2

3

4

5
Disconnecting the Battery for Transport

Always DISCONNECT THE BATTERY(s) before shipping in compliance with U.S. Department of Transportation (DOT) and IATA regulations.

The battery(s) may remain in the UPS.

1. Shut down and disconnect any equipment attached to the UPS.

2. Shut down and disconnect the UPS from the power supply.

3. Unplug the battery connectors. Refer to Replacing Battery modules in this manual.

For shipping instructions contact APC by Schneider Electric at the web site, www.apc.com.
# Troubleshooting

Use the table below to solve minor installation and operation problems. Refer to the APC by Schneider Electric web site, [www.apc.com](http://www.apc.com) for assistance with complex UPS problems.

<table>
<thead>
<tr>
<th>Problem and Possible Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>UPS WILL NOT TURN ON</strong></td>
<td></td>
</tr>
</tbody>
</table>
Battery not connected properly. | Check that the battery connectors are fully engaged.  
UPS button not pushed. | Press the UPS button once to power the UPS and the connected equipment.  
UPS not connected to utility power supply. | Check that the power cable from the UPS to the utility power supply is securely connected at both ends.  
Very low or no utility voltage. | Check the utility power supply to the UPS by plugging in a table lamp. If the light is very dim, have the utility voltage checked. |
| **UPS WILL NOT TURN OFF** |  
UPS button not pushed. | Press the UPS button once to turn the UPS off.  
Internal UPS fault. | Do not attempt to use the UPS. Unplug the UPS and have it serviced immediately. |
| **UPS BEEPS OCCASIONALLY** | None. The UPS is protecting the connected equipment. |
| **UPS DOES NOT PROVIDE EXPECTED BACKUP TIME** |  
The UPS battery(s) are weak due to a recent outage or battery(s) are near the end of their service life. | Charge the battery(s). Battery modules require recharging after extended outages. They wear faster when put into service often or when operated at elevated temperatures. If the battery(s) are near the end of their service life, consider replacing the battery(s) even if the Replace Battery LED is not illuminated. |
| **FRONT PANEL LEDS FLASH SEQUENTIALLY** | None. The UPS will restart automatically when utility power returns. |
| **ALL LEDS ARE OFF AND THE UPS IS PLUGGED INTO A WALL OUTLET** |  
The UPS is shut down and the battery is discharged from an extended outage. | None. The UPS will return to normal operation when the power is restored and the battery has a sufficient charge. |
<p>| <strong>BYPASS AND OVERLOAD LEDS ILLUMINATE, UPS EMITS A SUSTAINED ALARM TONE</strong> | The connected equipment exceeds the specified “maximum load” as defined in Specifications on the APC by Schneider Electric web site, <a href="http://www.apc.com">www.apc.com</a>. The alarm remains on until the overload is removed. Disconnect nonessential equipment from the UPS to eliminate the overload condition. |</p>

**SERVICE AND TRANSPORT**

If the UPS requires service do not return it to the dealer. Follow these steps:

1. Review the problems discussed in the *Troubleshooting* section of this manual to eliminate common problems.

2. If the problem persists, contact APC by Schneider Electric Customer Support through the APC web site, [www.apc.com](http://www.apc.com).
   - Note the model number of the UPS, the serial number located on the back of the unit, and the date purchased. If you call APC by Schneider Electric Customer Support, a technician will ask you to describe the problem and attempt to solve it over the phone. If this is not possible, the technician will issue a Returned Material Authorization Number (RMA#).
   - If the UPS is under warranty, repairs are free.
   - Procedures for servicing or returning products may vary internationally. Refer to the APC by Schneider Electric web site for country specific instructions.

3. Pack the UPS in its original packaging.
   - If the original packing is not available, refer to the APC by Schneider Electric web site, [www.apc.com](http://www.apc.com) for information about obtaining a new set.
   - Pack the UPS properly to avoid damage in transit. Never use Styrofoam beads for packaging. Damage sustained in transit is not covered under warranty.

   **Always DISCONNECT THE BATTERY(S) before shipping in compliance with U.S. Department of Transportation (DOT) and IATA regulations.**

   **The battery(s) may remain in the UPS.**

4. Mark the RMA# on the outside of the package.

5. Return the UPS by insured, prepaid carrier to the address given to you by Customer Support.

**Transport**

1. Shut down and disconnect all connected equipment.
2. Disconnect the unit from utility power.
3. Disconnect all internal and external batteries (if applicable).
4. Follow the shipping instructions outlined in the *Service* section of this manual.
LIMITED FACTORY WARRANTY

Schneider Electric IT Corporation (SEIT), warrants its products to be free from defects in materials and workmanship for a period of two (2) years excluding the batteries, which are warranted for one (1) year from the date of purchase. The SEIT obligation under this warranty is limited to repairing or replacing, at its own sole option, any such defective products. Repair or replacement of a defective product or parts thereof does not extend the original warranty period.

This warranty applies only to the original purchaser who must have properly registered the product within 10 days of purchase. Products may be registered online at warranty.apc.com.

SEIT shall not be liable under the warranty if its testing and examination disclose that the alleged defect in the product does not exist or was caused by end user’s or any third person’s misuse, negligence, improper installation, testing, operation or use of the product contrary to SEIT’s recommendations or specifications. Further, SEIT shall not be liable for defects resulting from: 1) unauthorized attempts to repair or modify the product, 2) incorrect or inadequate electrical voltage or connection, 3) inappropriate on site operation conditions, 4) Acts of God, 5) exposure to the elements, or 6) theft. In no event shall SEIT have any liability under this warranty for any product where the serial number has been altered, defaced, or removed.

EXCEPT AS SET FORTH ABOVE, THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, BY OPERATION OF LAW OR OTHERWISE, APPLICABLE TO PRODUCTS SOLD, SERVICED OR FURNISHED UNDER THIS AGREEMENT OR IN CONNECTION HEREWITH.

SEIT DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY, SATISFACTION AND FITNESS FOR A PARTICULAR PURPOSE.

SEIT EXPRESS WARRANTIES WILL NOT BE ENLARGED, DIMINISHED, OR AFFECTED BY AND NO OBLIGATION OR LIABILITY WILL ARISE OUT OF, SEIT’S RENDERING OF TECHNICAL OR OTHER ADVICE OR SERVICE IN CONNECTION WITH THE PRODUCTS.

THE FOREGOING WARRANTIES AND REMEDIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES AND REMEDIES. THE WARRANTIES SET FORTH ABOVE CONSTITUTE SEIT’S SOLE LIABILITY AND PURCHASER’S EXCLUSIVE REMEDY FOR ANY BREACH OF SUCH WARRANTIES. SEIT WARRANTIES EXTEND ONLY TO ORIGINAL PURCHASER AND ARE NOT EXTENDED TO ANY THIRD PARTIES.

IN NO EVENT SHALL SEIT, ITS OFFICERS, DIRECTORS, AFFILIATES OR EMPLOYEES BE LIABLE FOR ANY FORM OF INDIRECT, SPECIAL, CONSEQUENTIAL OR PUNITIVE DAMAGES, ARISING OUT OF THE USE, SERVICE OR INSTALLATION OF THE PRODUCTS, WHETHER SUCH DAMAGES ARISE IN CONTRACT OR TORT, IRRESPECTIVE OF FAULT, NEGLIGENCE OR STRICT LIABILITY OR WHETHER SEIT HAS BEEN ADVISED IN ADVANCE OF THE POSSIBILITY OF SUCH DAMAGES. SPECIFICALLY, SEIT IS NOT LIABLE FOR ANY COSTS, SUCH AS LOST PROFITS OR REVENUE, WHETHER DIRECT OR INDIRECT, LOSS OF EQUIPMENT, LOSS OF USE OF EQUIPMENT, LOSS OF SOFTWARE, LOSS OF DATA, COSTS OF SUBSTITUANTS, CLAIMS BY THIRD PARTIES, OR OTHERWISE.

NOTHING IN THIS LIMITED WARRANTY SHALL SEEK TO EXCLUDE OR LIMIT SEIT’S LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM ITS NEGLIGENCE OR ITS FRAUDULENT MISREPRESENTATION OF TO THE EXTENT THAT IT CANNOT BE EXCLUDED OR LIMITED BY APPLICABLE LAW.

To obtain service under warranty you must obtain a Returned Material Authorization (RMA) number from customer support. Customers with warranty claims issues may access the SEIT worldwide customer support network through the SEIT Web site: www.apc.com. Select your country from the country selection drop down menu. Open the Support tab at the top of the web page to obtain information for customer support in your region. Products must be returned with transportation charges prepaid and must be accompanied by a brief description of the problem encountered and proof of date and place of purchase.
REGULATORY

Radio Frequency Warnings

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference. The user is responsible for correcting the interference.

Shielded signal cables must be used with this product to ensure compliance with the Class A FCC limits.
