- Seligenstadt, Germany +49 6182 81 2900, <mailto:techsupport.seligenstadt@modicon.com>

---

**Detailed Description**

Normally it is possible to force 0x or 1x registers under Concept. In case where the addresses are assigned to the 140 NOA 622 00 INTERBUS master module this is not possible. However, all other functions of the RDE ( Reference Data Editor ) can be used as normal.
