

Addendum - NMC Card

The AP9631 Network Management Card (NMC) is updated to the more versatile AP9641, in this product. AP9641 provides additional features and improved functionality as indicated below. Illustrations and/or writeup in the manuals may refer to the previous version of NMC.

Previous version of NMC (AP9631)

Latest version of NMC (AP9641)

A brief description of the changes are given below.

- 3.5 mm radio jack console port is replaced with micro-USB type console port. Accordingly, the cable is changed to support the micro-USB connection.
- Network Management Card Utility CD is no longer supplied with this product.
- To know more about the security on your APC UPS Network Management Card, please visit <https://www.apc.com/secure-nmc>.
- To access all the network management documentation and download firmware updates, configuration wizards and MIB, visit <https://www.apc.com/upsnmc>.
- For network-based, graceful, unattended shutdown of your physical servers and virtual machines, it is highly recommended that you install the latest version of PowerChute™ Network Shutdown. Learn more and download for free from <https://www.apc.com/pens>.
