

# InfraStruXure<sup>®</sup> Cooling Distribution Unit Adapter Kit BSPT/Metric (ACAC20012)

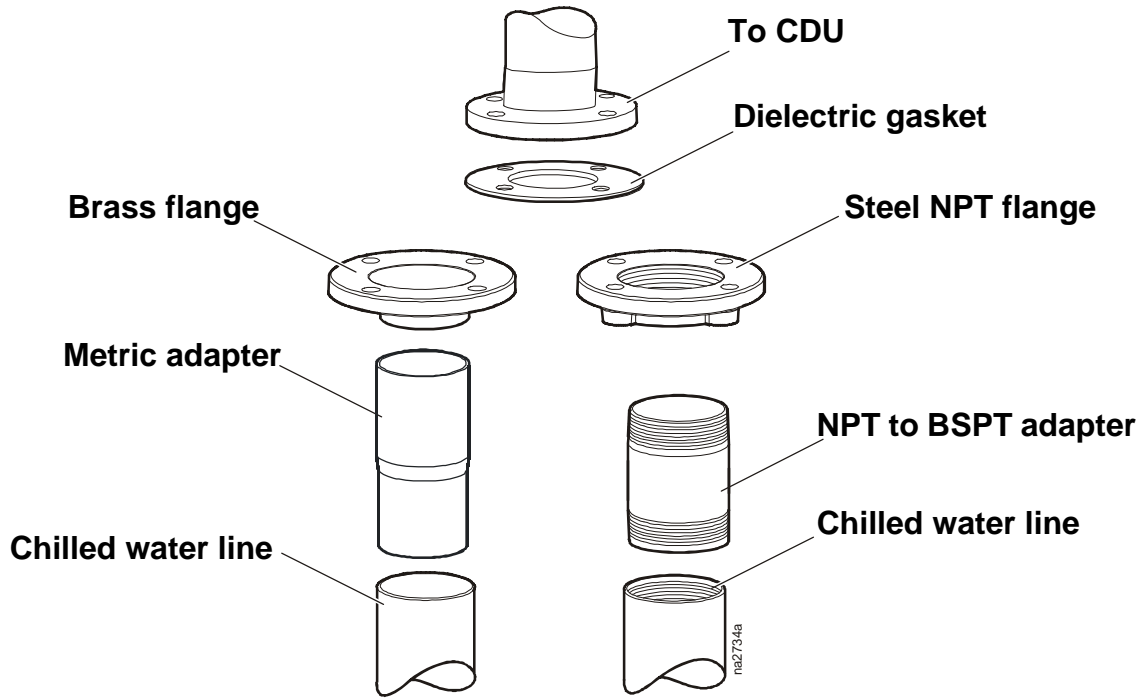

**Note:** Use this information sheet with your InfraStruXure Cooling Distribution Unit (CDU) Installation Manual.

An adapter must be installed between metric sized or BSPT (British Standard Pipe Thread) chilled water pipes and the flanges from the dielectric flange kit. The adapter kit contains two copper adapters and two threaded steel adapters. One side of the steel adapters has NPT (National Pipe Thread) pipe threads for attaching to the steel flange. The other side has BSPT pipe threads for joining to the steel chilled water pipe. The copper adapter has a 3-in end for attaching to the brass flange that connects to the CDU. The metric end of the copper adapter is 76-mm pipe for joining to the copper chilled water pipe.

Connect adapters between CDU flanges and chilled water supply and return pipes.
