

Description

- for recalling up to ten different room functions for lighting, sunblind, etc.
- suitable for (art. no.: MTN880551, MTN880921, MTN880931)

Function

The IR Remote Control is battery charged and for switching and controlling of devices which are equipped with an IR receiver.

The 10 individual channels can be controlled by 10 device keys. When a key is pushed, a command is transmitted. The red LED indicates this event by a short flashing.

Mounting

The IR Remote Control is suited for interior areas of buildings only.

The batteries are set in the intended box on the back of the device. Note the right pole position! If the red LED does not flash anymore when the keys are pressed, the batteries should be changed as soon as possible.

Remarks

Installation and assembly of electrical devices may take place only by an electrical specialist.
