

# We help on every step of the value chain

### **Efficient facilities**

Safer, more available, and greener resources

# Resilient supply chain Manage complexity and improve visibility

### Agile manufacturing

Boost manufacturing flexibility & efficiency

# ... enabled by transversal digital transformation capabilities

### Food Safety & Traceability

Ensure compliance and increase trust across the whole value chain

### **Energy & Sustainability**

Reduce environmental footprint and meet sustainability goals

#### **Asset Performance**

Maximize return on asset investment

### Workforce Empowerment

Take teams efficiency to the next level

### **Digital Engineering**

Cut time, cost and risks of capital project engineering

# Manage complexity and improve visibility across your Supply Chain

# Agriculture efficiency & sustainability

Help farmers and agribusiness improve productivity, better manage the use of resources and achieve regulation compliance and traceability.

# Greater yield leveraging digital

leveraging digital solutions

# Warehouse management

Ensure process, control and optimization of warehouse operations to improve efficiency and address ecommerce imperatives.

Increased productivity while ensuring safety

# Supply chain optimization

Increase your visibility, improve agility and performance to build a resilient supply chain, end-to-end.

Build a **resilient**Supply Chain

# Product Information Management

Ensure the right information related to the product is available for a seamless omnichannel retail experience

Up to 17% increase in data accuracy

# Cold chain monitoring

Manage efficiently your assets tracking, performance and maintenance to optimize your supply chain logistics

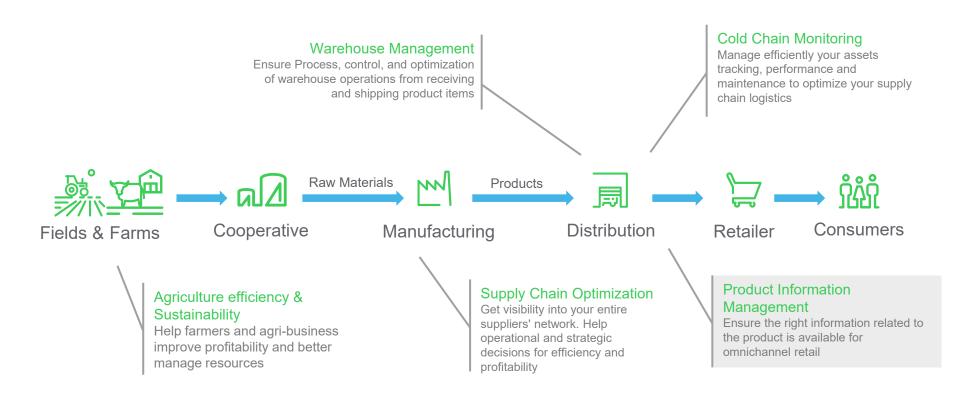

Ensure efficient & secure operations

### Resilient Supply Chain

Manage complexity and improve visibility across your supply chain

### **Product Information Management**

Ensure the right information related to the product is available for omnichannel retail

300 attributes per SKU

### Multiple sources and usages of Product Data

 New product rollouts take in average 4 weeks due to inefficient & error on item attributes.

### **Omnichannel Retail Strategy**

- Retailers want more Product Data in less than 3 days
- Seamless shopping experience for the endconsumers across the different channels
- E-Commerce booming According to WEF, from 10% today up to 40% in 2027

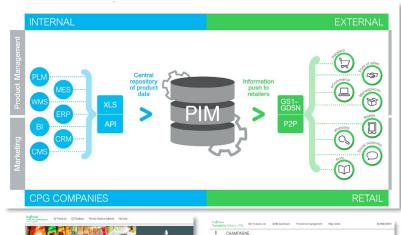

## EcoStruxure<sup>™</sup> Traceability Advisor – PIM

Ensure the right information related to the product is available for omnichannel retail

### The solution

- «Out-of-the-shelf» pre-parameterized solution: a central repository for product information storage and management used by CPG manufacturers and a tool to push product information from multi-source data to different retail channels
- Complete suite of solution: PIM + GDSN + Datapool
- Specific F&B features: Pricing attribute, product Data syndication, Promotion and Call for Tender Management
- Compliant to GS1 standards and GDSN requirements
- Cloud-based solution aligned with latest Cyber Security requirements
- Smart & Flexible, easy to integrate more product attributes on demand (GS1 and/or local regulation/standard)
- Includes Marketing B2C features, thanks to DAM (Digital Asset Management) integrated in a unique solution
- Easy to scale up with a typical ROI << 1 year</li>

PLM: Product Lifecycle Management MES: Manufacturing Execution System WMS: Warehouse Management System ERP: Enterprise Resource Planning

BI: Business Intelligence

CRM: Customer Relationship Management CMS: Content Management System

### EcoStruxure Traceability Advisor – PIM

Ensure the right information related to the product is available for omnichannel retail

# up to \$80 saved per SKU

### **Business value**

- Increased product data accuracy
  Reduction of data redundancy and data storage costs
- Faster time to market
   Fast track new products on standardized templates
- Increased operational efficiency
   Consolidation of information from disparate systems
- Reduction of business risks
   PIM enables data compliance with industry regulations
   (e.g. in Europe, Directive n°1169/2011 INCO information for labelling of products; and FDA 21CFR part 101)
- Improved shopping experience
   PIM is a central repository with a single up-to-date version of product data enabling a seamless shopping experience for your end-consumers

ಟ್ಟ

### Data transparency

Quality and availability Improve end-user stickiness Reduce business risks (GS1 compliant) between 17 – 56% increase in online conversion rates

#### Operational efficiency

Reduce data redundancy Reduce data storage costs

Minimized time to market

Enhanced shopping experience Enhanced SEO visibility

Optimize data exchange

Connecting the entire Value Chain into a single App

See 3D demo

# Leader in Fruits & Dairy Products, France

### **Customer Challenge**

- Manage the product references (25,000 products) in a consistent way between the different entities using different ERPs and MES systems in 24 countries.
- Share the product information efficiently with retailers in a multi-channel environment.

#### The Solution

- Deployment of EcoStruxure Traceability Advisor - Product Information Management (PIM),
  - internal solution deployed in 24 countries

#### **Customer Benefits**

- Central team deploying the solution globally
- · Reduction of costs and errors linked to product data management
- Improved data quality & availability: +20% increase in data accuracy
- · Reduced time to market: speed-up internal workflow from factories to sales entities and ease data exchange with end-customers
- Process effectiveness: +50% reduction in labour costs

The Results: Life is On with... A single source of truth and trust regarding **Product Data** 

French leader in fruits and dairy products with strong international presence
